## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

## First Estimates(1) – July 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961 = 100) for July showed a decline of 0.6% from the June level. The largest factor in this decline were the industrial disputes in wood products and in related industries in British Columbia. Employment was down in all regions, except Ontario.

Unadjusted for seasonal variations, average weekly earnings for the Canada industrial composite rose 0.6% to \$203.95. Gains were recorded in all industry divisions except forestry, mining and manufacturing. All regions, except British Columbia, showed increases.

## Preliminary Data(1) – June 1975

## Employment - Seasonally-adjusted

Preliminary data for June 1975 showed virtually no change from May in the *Canada* industrial composite index of employment. Increases in forestry, manufacturing and service balanced declines in remaining industry divisions.

Employment in manufacturing rose 0.3%. Gains in durable goods, mainly transportation equipment and wood products, were somewhat offset by declines in non-durable goods, mainly food and beverages. Forestry advanced 5.9% mainly reflecting increases in the Atlantic Region. The 0.4% advance in service largely reflected gains recorded in hotels, restaurants and taverns, and miscellaneous services.

Construction employment dropped 5.2% in June. This decline was the result of industrial disputes in building in Ontario, Alberta and Newfoundland plus declines in engineering in Ontario. Employment in trade showed a 0.3% decrease from May to June for the most part reflecting declines in department stores.

Employment in mining recorded a 1.5% decline in June. The largest element of this decline were the layoffs in Atlantic Region coal following a natural calamity. Transportation, communication and other utilities posted a 0.4% decline mainly reflecting widespread increases in the transportation and communication components, while the 0.5% drop in finance, insurance and real estate reflected increases in both financial institutions and insurance and real estate.

See note on Statistical Presentation under Concepts and Methods at the back of this publication.

Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

## Premières estimations (1) – juillet 1975

La première estimation désaisonnalisée de l'indice composite (2) de l'emploi dans les activités économiques du Canada (1961 = 100) fait état d'une baisse de 0.6% entre juin et juillet. Cette baisse est surtout attribuable aux conflits du travail dans les industries des produits du bois et les industries connexes en Colombie-Britannique. Le niveau de l'emploi a diminué dans toutes les régions, sauf en Ontario.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.6% pour atteindre \$203.95 pour l'ensemble du Canada. Toutes les divisions d'activité économique à l'exception du forestage, des mines et des manufactures, et toutes les régions sauf la Colombie-Britannique ont contribué à cette augmentation.

## Données provisoires (1) – Juin 1975

## Emploi - chiffres désaisonnalisés

Les données provisoires de juin 1975 pour l'indice composite de l'emploi dans les activités économiques du Canada n'ont pratiquement pas varié par rapport à celles de mai. Les augmentations dans le forestage, les manufactures et les services ont compensé les diminutions dans les autres divisions d'activité économique.

L'emploi a connu une hausse de 0.3% dans les industries manufacturières. Les augmentations dans les biens durables, principalement dans le matériel de transport et les produits du bois, ont été quelque peu neutralisées par les diminutions enregistrées dans les biens non durables, principalement dans les aliments et les boissons. Les augmentations observées dans les régions de l'Atlantique ont été le principal facteur de la progression de 5.9% enregistrée dans le forestage. Quant à l'accroissement de 0.4% dans les services, il est largement attribuable aux augmentations qui ont eu lieu dans les hôtels, les restaurants et les tavernes, ainsi que dans les services divers.

Dans le domaine de la construction, l'emploi a diminué de 5.2% en juin. Cette diminution résultait des conflits du travail qui se sont produits dans le bâtiment en Ontario, en Alberta et à Terre-Neuve, ainsi que des baisses dans les travaux de génie civil en Ontario. L'emploi dans le commerce a régressé de 0.3% entre mai et juin, principalement à cause des diminutions enregistrées dans les grands magasins.

L'emploi dans les mines a diminué de 1.5% en juin. Les mises à pied dans les charbonnages de la région de l'Atlantique à la suite d'un sinistre ont constitué l'élément le plus important de cette baisse. Les transports, les communications et autres services d'utilité publique ont accusé une baisse de 0.4%, principalement à cause des diminutions très répandues dans les transports et les communications, alors que la régression de 0.5% dans les finances, les assurances et l'immeuble était attribuable aux diminutions enregistrées à la fois dans les établissements financiers et dans les assurances et l'immeuble.

- (1) Voir la note sur la présentation statistique, sous la rubrique 'Concepts et méthodes' à la fin de cette publication.
- (2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Toutes les statistiques se fondent sur des données reçues des employeurs ayant vingt (20) employés ou plus à leur service au cours de n'importe quel mois de l'année.

In the *Atlantic Region*, the composite index fell 1.4% from May to June. Decreases were recorded in all provinces except Newfoundland. Employment advances in logging and forestry services were more than offset by declines in coal, fish products, building, highway and bridge maintenance, and hotels, restaurants and taverns.

The *Quebec* industrial composite employment index decline slightly in June. Decreases in employment were recorded in food and beverages, primary metal industries, electrical products and financial institutions. These declines were substantially offset by gains in logging, wood products and water transport and services.

In *Ontario*, employment at the industrial composite level showed a 0.3% decline in June. While employment in manufacturing and service rose, largely reflecting gains in motor vehicles and in hotels, restaurants and taverns, decreases occurred in building, engineering, department stores and insurance and real estate.

The composite index of employment for the *Prairie Region* declined slightly; gains in Manitoba were offset by decreases in Saskatchewan and Alberta. Losses due to industrial disputes in building plus widespread decreases in mining were virtually balanced by gains in both durable and non-durable manufacturing and all service components.

In *British Columbia*, employment rose 0.3% at the industrial composite level from May to June. Gains in logging and wood products more than offset declines in food and beverages, transportation and department stores.

### Earnings and Hours

*Seasonally-adjusted*, average weekly earnings rose 0.7% at the Canada industrial composite level in June. Gains were recorded in all industry divisions and in all five regions.

*Unadjusted for seasonal variation*, average weekly earnings for the Canada industrial composite rose 1.2% to \$202.80. All provinces contributed to the overall rise in the level of earnings.

In *forestry*, increases in hours paid were offset by substantial gains in employment in the Atlantic Region where earnings are lower than the national average. Average weekly earnings rose 0.1% to \$255.75.

Average weekly earnings in *mining* rose from \$273.13 in May to \$273.95 in June mainly reflecting gains in metals. Average weekly hours of hourly-rated wage-earners dropped 1.5% to 39.0, while average hourly earnings gained 12 cents to \$6.50.

In *manufacturing*, average weekly earnings increased 0.8% in June to \$212.38. Gains were recorded in all major groups, except primary metal industries and transportation equipment, which declined. Average weekly hours decreased from 38.6 to 38.4; average hourly earnings showed a 6 cent rise to \$5.07.

Dans la *Région de l'Atlantique*, l'indice composite a regressé 1.4% de mai à juin; des diminutions se sont produites dans toutes provinces à l'exception de Terre-Neuve. Les augmentations de l'emploi dans l'abattage et les services forestiers ont été plus que neutralisées par diminutions dans le charbon, les produits de la pêche, le bâtiment, l'entretien des routes et des ponts, et dans les hôtels, restaurants et tavernes.

Au *Québec*, l'indice composite de l'emploi a légèrement diminué en juin. Bien que des augmentations aient été enregistrées dans les manufactures et les services, surtout en raison des augmentations observées dans les véhicules à moteur et dans les hôtels, restaurants et tavernes, des diminutions se sont produites dans le bâtiment, le génie, les grands magasins et assurances et l'immeuble.

En *Ontario*, l'indice composite de l'emploi a diminué de 0.3% en juin. Bien que des augmentations aient été enregistrées dans les manufactures et les services, surtout en raison des augmentations observées dans les véhicules à moteur et dans les hôtels, restaurants et tavernes, des diminutions se sont produites dans le bâtiment, le génie, les grands magasins et assurances et l'immeuble.

L'indice composite de l'emploi a légèrement baissé dans la *Région des Prairies*; Les augmentations au Manitoba ont été neutralisées par diminutions en Saskatchewan et en Alberta. Les diminutions résultant de conflits du travail dans le bâtiment et également de baisses générales dans les mines ont été pratiquement compensées par des augmentations qui sont produites dans les biens durables et non durables des manufactures et dans tous les services.

En *Colombie-Britannique*, l'indice composite de l'emploi a progressé de 0.3% entre mai et juin. Les augmentations qui ont compensé l'abattage et les produits du bois ont plus que compensé les pertes observées dans les aliments et boissons, les transports et les grands magasins.

### Gains et heures de travail

*Les gains hebdomadaires moyens désaisonnalisés* au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.7% en juin. Des hausses ont été enregistrées dans toutes les divisions d'activités dans chacune des cinq régions.

*Les gains hebdomadaires moyens non désaisonnalisés* ont progressé de 1.2% pour atteindre \$202.80 au niveau de l'ensemble du Canada. Une augmentation générale des gains a été observée dans toutes les provinces.

Dans le *forêtage*, l'accroissement du nombre d'heures rémunérées a été contrebalancé par des augmentations substantielles de l'emploi dans la région de l'Atlantique où les gains sont inférieurs à la moyenne nationale. Les gains hebdomadaires moyens se sont accrus de 0.1% pour s'établir à \$255.75.

Les gains hebdomadaires moyens dans les *mines* ont augmenté pour passer de \$273.13 en mai à \$273.95 en juin, principalement à la suite d'augmentations dans les métaux. Le nombre moyen d'heures hebdomadaires travaillées par les ouvriers payés à l'heure est tombé de 1.5% pour se situer à 39.0 alors que les gains horaires moyens ont progressé de 12 cents pour se fixer à \$6.50.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 0.8% en juin pour atteindre \$212.38. Des augmentations ont été observées dans tous les groupes principaux à l'exception des premières transformations des métaux et du matériel de transport, qui ont accusé une baisse. Le nombre moyen d'heures hebdomadaires travaillées a diminué, passant de 38.6 à 38.4; toutefois, les gains horaires moyens ont connu une hausse de 6 cents pour s'établir à \$5.07.

Average weekly earnings in *construction* climbed from \$284.18 in May to \$286.24 in June. For the most part, this rise reflected widespread increases in the engineering component. Average weekly earnings increased to 39.7 from 39.3, while average hourly earnings jumped to \$7.26 from \$7.29.

The 0.9% advance in average weekly earnings in *transportation, communication and other utilities* largely reflected gains in transportation and utilities. Average weekly earnings in *trade* jumped 1% in June to \$162.51 due to widespread increases in both wholesale and retail.

In *finance, insurance and real estate*, average weekly earnings rose 0.3% in June with gains in both financial institutions and insurance and real estate. Average weekly earnings in *service* rose 0.2% to \$143.04 reflecting rises in all components.

#### Year-to-date

#### Employment

The average of the monthly employment indexes for the first six months of 1975, compared with the same period for 1974, showed a 0.4% decline in the industrial composite employment index for Canada. While the first quarter of 1975 had shown a decline of 0.2% compared with 1974, the second quarter was down 0.6% from the same period a year earlier. Employment reductions in forestry and manufacturing more than offset rises in the remaining industry groups.

Employment in forestry fell 1.7% over the year. A substantial drop occurred during the second quarter, particularly in British Columbia, where a large part of the first quarter loss (6.1%). In mining, employment showed almost no change as gains in iron and coal were offset by declines in services incidental to mining and by losses due to industrial disputes in asbestos.

Manufacturing employment during the first six months of 1975 was down 5.2% over the year. Decreases were recorded in 15 out of 20 major groups. Gains of from 2% to 3% were recorded in machinery, petroleum and coal products, chemicals and chemical products, printing and publishing, and rubber products; all other industry groups showed declines. Decreases of 10% or more occurred in food products, furniture and fixtures, textile products, and miscellaneous manufacturing industries.

In construction, employment was up 1.5% mainly reflecting gains in other engineering. The 3.5% rise in transportation, communication and other utilities largely reflected rises in communication and utilities. Employment in the transportation component rose only 1.3% over the year as gains in air transport and services and in urban transit were somewhat offset by reduction in truck transport.

Employment in trade was up 2.3% reflecting widespread gains in both wholesale and retail, while the 4.6% advance in finance, insurance and real estate was in both financial institutions and

Dans la *construction* les gains hebdomadaires moyens se sont accrus, passant de \$284.18 en mai à \$286.24 en juin. La majeure partie de cet accroissement résultait des augmentations générales enregistrées dans les composantes du génie. Le nombre moyen d'heures hebdomadaires a augmenté, passant de 39.3 à 39.7 alors que les gains horaires moyens ont diminué, passant de \$7.29 à \$7.26 cents.

L'accroissement de 0.9% des gains hebdomadaires moyens dans les *transports, les communications et autres services d'utilité publique* est en grande partie attribuable aux augmentations dans les transports et les services d'utilité publique. Les gains hebdomadaires moyens dans le *commerce* ont progressé de 3.3% en juin, pour s'établir à \$162.51 à la suite d'augmentations générales, à la fois dans le commerce de gros et dans le commerce de détail.

Dans les *finances, les assurances, et l'immeuble*, les gains hebdomadaires moyens se sont accrus de 0.3% en juin, à la suite d'augmentations dans les établissements financiers et dans les assurances et l'immeuble. Les gains hebdomadaires moyens dans les services ont progressé de 1.6% pour atteindre \$143.04 en raison d'augmentations dans toutes les composantes.

#### Chiffres cumulatifs annuels

#### Emploi

La moyenne des indices mensuels de l'emploi du premier semestre de 1975, comparativement au semestre correspondant de 1974, a diminué de 0.4% au niveau de l'indice composite de l'emploi dans les activités économiques du Canada. Au premier trimestre de 1975, on a observé une baisse de 0.2% par rapport à 1974 et au deuxième trimestre, on a enregistré une diminution de 0.6% par rapport à la même période de l'année précédente. Les diminutions de l'emploi dans le forestage et les industries manufacturières ont plus que neutralisé les augmentations dans les autres branches d'activité.

L'emploi dans le forestage a régressé de 1.7% par rapport à l'année précédente. Une remontée considérable au cours du deuxième trimestre, particulièrement en Colombie-Britannique, a, dans une large mesure, compensé les pertes du premier trimestre (6.1%). Dans les mines, l'emploi n'a pratiquement pas varié, étant donné que les augmentations dans le fer et le charbon ont été neutralisées par les baisses enregistrées dans les services miniers et par les diminutions résultant des conflits du travail qui sont produits dans le secteur de l'amiante.

Au cours des six premiers mois de 1975, l'emploi dans les industries manufacturières a baissé de 5.2% par rapport à l'année précédente. Des diminutions ont été observées dans 15 des 20 groupes principaux. Toutefois, des augmentations de 2 à 3% se sont produites dans les machines, le pétrole, le charbon et leurs dérivés, dans l'industrie chimique et des produits connexes, l'imprimerie et l'édition et dans les produits du caoutchouc; tous les autres groupes ont enregistré des baisses. Des diminutions de 10% ou plus ont été observées dans les produits du bois, les meubles et les accessoires d'ameublement, les produits du textile et les industries manufacturières diverses.

Dans la construction, l'emploi a progressé de 1.5%, en raison principalement d'augmentations dans le secteur 'autre génie civil.' Quant à la progression de 3.5% dans les transports, les communications et autres services d'utilité publique, elle faisait suite aux augmentations qui ont eu lieu dans les communications et les services d'utilité publique. L'emploi dans la composante des transports ne s'est accru que de 1.3% par rapport à l'année précédente, tandis que l'accroissement dans les transports aériens et services et dans les transports urbains a été quelque peu neutralisé par des diminutions dans les transports par camion.

L'emploi dans le commerce a progressé de 2.3%, à la suite d'augmentations générales dans le commerce de gros et de détail, et l'accroissement de 4.6% dans les finances, les assurances et l'immeuble a été enregistré

insurance and real estate. In service, employment rose 3.2% over the year mainly reflecting increases in business services and hotels, restaurants and taverns.

### Earnings

The average for the first six months of 1975, compared with the same period for 1974, showed a 14.6% rise in average weekly earnings at the Canada industrial composite level. Provincial advances ranged from 12.8% in Ontario to 20.3% in New Brunswick.

In forestry, average weekly earnings were up 20.1% over the year; regional increases ranged from 17.2% in the Atlantic Region to 22.1% in the Prairie Region. Average weekly earnings in mining showed a 17.6% advance. This advance reflected an 18.5% increase in average hourly earnings, plus reduced employment due to industrial disputes in asbestos where earnings are lower than the national industry average.

Average weekly hours declined 1.2% over the year mainly reflecting decreases in mineral fuels and non-metals.

In manufacturing, average weekly earnings for the first six months of 1975 showed a 15.9% rise from the comparable period for 1974. Average hourly earnings rose 17.7% with increases ranging from 13.5% in transportation equipment to 20.3% in food and beverages. Average weekly hours were down 1.8% over the year. Declines were recorded in 19 of the 20 major groups; only food and beverages showed a slight rise.

Average weekly earnings in construction recorded a 14.4% increase for the first six months of 1975. Average hourly earnings were up 15.6% and average weekly hours down 0.9%. In transportation, communication and other utilities, average weekly earnings were up 13.7%. Among its components, storage showed the largest advance (17.9%) and communication the smallest (12.5%).

In trade, average weekly earnings rose 14.3% over the year with gains of 14.8% in wholesale and 14.1% in retail. Finance, insurance and real estate showed the smallest industrial advance for the year-to-date (11.5%) as a 14.3% rise in financial institutions was considerably offset by a gain of only 7.4% in insurance and real estate.

Average weekly earnings in service rose 14.6% compared with the first six months of 1974; the largest component increase (16.0%) was in miscellaneous services.

à la fois dans les établissements financiers et dans les assurances, l'immeuble. Dans les services, l'emploi s'est accru de 3.2% par rapport à l'année précédente en raison surtout d'augmentations dans les services extérieurs des entreprises et dans les hôtels, restaurants et tavernes.

### Gains

La moyenne des premiers six mois de 1975, comparativement à la même période de 1974, indique une augmentation de 14.6% des gains hebdomadaires moyens au niveau de l'exemple des activités économiques du Canada. Dans les provinces, les augmentations variaient entre 12.8% en Ontario et 20.3% au Nouveau-Brunswick.

Les gains hebdomadaires moyens dans le forestage ont progressé de 20.1% par rapport à l'année précédente; dans les régions, les augmentations s'échelonnaient entre 17.2% dans la région de l'Atlantique et 22.1% dans la région des Prairies. Les gains hebdomadaires moyens dans les mines se sont accrus de 17.6%, principalement à cause d'une augmentation de 18.5% dans les gains horaires moyens, et d'une diminution de l'emploi résultant des conflits du travail dans le secteur de l'amiante où les gains sont inférieurs à la moyenne nationale.

Le nombre moyen d'heures hebdomadaires travaillées a diminué de 1.2% par rapport à l'année précédente, principalement en raison de baisses dans les combustibles minéraux et les minéraux non métalliques.

Au cours des six premiers mois de 1975 les gains hebdomadaires moyens dans les industries manufacturières ont augmenté de 15.9% par rapport à la même période de 1974. Quant aux gains horaires moyens, se sont accrus de 17.7%, leurs augmentations s'échelonnant entre 13.5% dans le matériel de transport et 20.3% dans les aliments et boissons. Le nombre moyen d'heures hebdomadaires travaillées a diminué de 1.8% par rapport à l'année précédente. Des baisses ont été observées dans 19 des groupes principaux; seul le groupe des aliments et boissons a enregistré une légère augmentation.

Les gains hebdomadaires moyens dans la construction ont progressé de 14.4% au cours des 6 premiers mois de 1975. Les gains horaires moyens se sont accrus de 15.6% mais le nombre moyen d'heures hebdomadaires travaillées a diminué de 0.9%. Dans les transports, les communications et autres services d'utilité publique, les gains hebdomadaires moyens ont augmenté de 13.7%. Parmi les composantes de ce groupe, l'entreposage a enregistré l'augmentation la plus considérable (17.9%) tandis que les communications ont connu l'accroissement le plus faible (12.5%).

Dans le commerce, les gains hebdomadaires moyens ont progressé de 14.3% par rapport à l'année précédente, avec des augmentations de 14.8% dans le commerce de gros et de 14.1% dans le commerce de détail. Ce sont les finances, les assurances et l'immeuble qui ont le moins progressé au niveau des chiffres cumulatifs annuels dans les industries (11.5%), étant donné qu'un accroissement de 14.3% dans les établissements financiers a été largement neutralisé par une augmentation de 7.4% seulement dans les assurances et l'immeuble.

Les gains hebdomadaires moyens dans les services ont augmenté de 14.6% par rapport aux premiers six mois de 1974; l'accroissement le plus important par élément, soit 16.0%, s'est produit dans les services divers.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées seulement). Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

## Firm Data

# **STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)** (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

## **1960**

Monthly data were not published but are available on

annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

## **1970**

*Employment Indexes*, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

*Employment Indexes*, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

*Average Weekly Earnings*, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Atlantic: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

*Average Weekly Earnings*, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

*Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners* - 1961-1967 for:

# **DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)** (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

## **A. 1957-1960**

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

## **B. 1961-1970**

*Indices de l'emploi*, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

*Indices de l'emploi*, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

*Gains hebdomadaires moyens*, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

*Gains hebdomadaires moyens*, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

*Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens* des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

*Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

*Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.*

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

### C. 1971-1973

*Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.*

*Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.*

*Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.*

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

*Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Toutes les autres données mensuelles et annuelles disponibles pour 1966 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1966-1968.9@r + 1

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

### C. 1971-1973

*Indices de l'emploi et gains hebdomadaires moyens, 1973, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.*

*Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.*

*Nombre d'employés à traitement, ensemble des employés à salaire (heures déclarées), rémunération hebdomadaire des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données de ces séries figurant dans d'autres numéros de ces publications ont peut-être été rectifiées depuis.

## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

### Reporting Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. In all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer than 20 employees.

### Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The ratios of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The ratios of the fractions are the number of working days in the pay period. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Industries are covered by the survey, with the exceptions of fishing and trapping, education and related services, welfare services, religious organizations, private household public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The stage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le chiement de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiement estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux, y compris l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

## Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

## Classification géographique

Les unités de déclaration sont affectées à une province, à un lieu, à une région urbaine. Les données de Terre-Neuve, du Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, du Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines comprennent généralement le territoire avoisinant avec le centre urbain. On peut obtenir une liste montrant le territoire inclus dans chaque région urbaine tabulée à partir du Monthly Employment,

nd Labour Income Section. The reporting units not located in the urban area are included in county, provincial and national statistics.

## Classification

Establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not possible to shift from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and their principal activities may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" for each industry is given in the main tables refer to this manual. The tables contain a list of industries not found in the Standard Industrial Classification.

*Industrial composite (031-899)* - The sum of the industries included in the survey. (see Coverage)

*Durable goods manufacturing (durable)* - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

*Non-durable goods manufacturing (non-dur)* - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and allied products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

*Contracting (404,421)* - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

*Engineering (406-409)* - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple (2012).

Employment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons performing nonremunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

*Ensemble des industries (031-899)* - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

*Manufactures, biens durables (durable)* - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

*Manufactures, biens non durables (non dur.)* - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

*Bâtiment (404, 421)* - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

*Genie civil (C.T.I. 406-409)* - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time employees* are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps* sont comptés parmi les employés quel que soit le nombre d'heures travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève ou des personnes en congé sans paye ne figurent pas parmi les employés occupés.

### Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, y compris le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les employés des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées en tenant compte d'après les données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

### Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'usine sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ou à la tâche, la rémunération du travail aux pièces et les commissions régulières, les primes de rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés.

ent publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was used.

## Nombres

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment index those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 procedure of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. The average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom detailed data are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes full-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

## Présentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimates because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the monthly tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiées; ces données sont publiées dans les publications 72-201 et 72-202.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des emplois à traitement et des employés à salaire indiqués séparément, signifient données relatives aux employés pour lesquels les heures sont enregistrées sont pas disponibles.

## First Estimates(1) - August 1975

Seasonally-adjusted, the first estimate of the Canada industrial (2) index of employment (1961 = 100) for August showed a rise of 0.9% from the July level. Declines were recorded in all divisions except forestry. There were employment reductions in all regions except the Atlantic Region.

Unadjusted for seasonal variations, average weekly earnings in the Canada industrial composite level rose 0.5% to \$206.17. Gains were recorded in all industry divisions except finance, insurance and real estate, and service. All regions, except British Columbia, showed gains.

## Preliminary Data(1) - July 1975

## Employment - Seasonally-Adjusted

Preliminary data for July 1975 showed a 0.2% decline in the Canada industrial composite employment index.

Reductions in employment manufacturing, forestry and service more than offset gains in the remaining industry divisions.

Employment in manufacturing fell 1.1% from June to July. A substantial industrial disputes in wood products and paper industries. Decreases were also recorded in metal fabrications, food and beverages, clothing, and electrical products. A substantially offsetting increase occurred in motor vehicle assembly due to changes in the manner in which employment was being during the model-changeover period.

A 9.1% decrease in forestry largely reflected the impact of industrial disputes in British Columbia. Employment in service fell 0.4% as decreases in recreational, personal and miscellaneous more than offset gains in the business component. Construction was virtually unchanged over-the-month as gains in building offset declines in engineering.

Employment in trade advanced 1.0% in July with increases in all components of both wholesale and retail. The 1.9% rise in service largely reflected increases in metals, following the resolution of industrial disputes, and in coal, following the callback of employers.

For more information on Statistical Presentation under Concepts and Methods, see the back of this publication.

The Canada Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and health services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers of twenty (20) or more employees in any month of the year.

## Premières estimations(1) - Août 1975

Après désaisonnalisation, la première estimation de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961 = 100) pour le mois d'août a enregistré une baisse de 0.9% par rapport au mois de juillet. On a observé des baisses dans toutes les divisions de l'activité économique à l'exception du forestage. L'emploi a diminué dans toutes les régions sauf celle de l'Atlantique.

Sans désaisonnalisation, les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.5% (\$206.17). On a enregistré des hausses dans toutes les divisions de l'activité économique sauf les finances, les assurances et l'immeuble et les services. Des augmentations ont été observées dans toutes les régions sauf en Colombie-Britannique.

## Données provisoires(1) - Juillet 1975

## Emploi - Chiffres désaisonnalisés

Les données provisoires pour juillet 1975 révèlent un recul de 0.2% de l'indice composite de l'emploi dans les activités économiques du Canada.

Les baisses dans la fabrication, le forestage et les services ont plus que compensé les hausses dans les autres divisions de l'activité économique.

De juin à juillet, l'emploi a baissé de 1.1% dans le secteur de la fabrication. Des conflits de travail importants sont survenus dans les secteurs des produits du bois et du papier et produits connexes. On a également enregistré des baisses dans les produits métalliques, les aliments et boissons, le vêtement et les appareils et matériel électriques. Une augmentation qui a beaucoup compensé ces diminutions s'est produite dans le domaine de l'assemblage des véhicules automobiles; elle est surtout attribuable au fait que l'emploi n'était plus enregistré de la même manière au cours de la période de changement de modèle.

La baisse de 9.1% dans le forestage est surtout attribuable aux conflits de travail en Colombie-Britannique. Dans les services, l'emploi a diminué de 0.4%, alors que des baisses dans les services récréatifs, les services personnels et les services divers ont plus que compensé les hausses dans les services extérieurs des entreprises. Le niveau de l'emploi dans la construction n'a presque pas varié, alors que des gains dans le bâtiment ont compensé les baisses dans le génie civil.

Dans le commerce, le niveau de l'emploi a progressé de 1.0% en juillet, des augmentations ayant été enregistrées dans nombre de composantes du commerce de gros et de détail. L'augmentation de 1.9% dans les mines est surtout attribuable aux augmentations dans les métaux, après le règlement de conflits de travail, et dans le charbon, après le rappel des employés mis à pied.

- (1) Voir présentation statistique sous 'Concepts et méthodes', à la fin de la présente publication.
- (2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Toutes les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

Transportation, communication and other utilities rose 0.3% as gains in highway and bridge maintenance, truck transport and communication more than offset losses in water transport and services. The 0.7% increase in finance, insurance and real estate reflected widespread gains in both financial institutions and insurance and real estate.

In the *Atlantic Region*, the industrial composite index of employment rose 0.7% in July; gains in Newfoundland and New Brunswick more than offset declines in Prince Edward Island and Nova Scotia. Employment increased in coal mining, building construction and both wholesale and retail trade. A somewhat offsetting decline was recorded in hotels, restaurants and taverns.

The *Quebec* industrial composite employment index rose slightly from June to July. There were increases in transportation equipment, paper and allied industries, highway and bridge maintenance, truck transport, insurance and real estate, printing, publishing and allied industries, and wood products. These gains were counterbalanced by declines in building, engineering, water transport and services, electrical products and clothing.

In *Ontario*, employment at the industrial composite level rose 1.1% in July. The largest single element in this increase was the rise in motor vehicle assembling. In addition, employment increased substantially in paper and allied industries, retail trade, building, engineering, financial institutions, and all components of transportation, communication and other utilities.

The industrial composite employment index for the *Prairie Region* rose 1.1% from June to July; increases were recorded in all three provinces. The largest gains were in retail trade (especially department stores), building, durable goods, and food and beverages.

In *British Columbia*, widespread industrial disputes were the major factor underlying a 6.6% drop in employment at the industrial composite level in July. Employment was down 32.6% in forestry, 20.6% in wood products and 57.6% in paper and allied industries. There were also declines in water transport and services, engineering and building; the rise in trade mainly reflected gains in the retail component.

### Earning and Hours

*Seasonally-adjusted*, average weekly earnings rose 1.3% at the Canada industrial composite level in July. Gains were recorded in all industry divisions except forestry, and in all regions except British Columbia.

*Unadjusted for seasonal variations*, average weekly earnings for the Canada industrial composite rose 1.0% to \$205.16. All provinces except British Columbia participated in the overall rise.

In *forestry*, average weekly earnings fell 8.4% to \$234.08 mainly reflecting reductions in hours paid in British Columbia and Quebec.

Average weekly earnings in *mining* rose from \$273.61 in June to \$276.23 in July. Increases were recorded in metals, non-metals and services incidental to mining. Average weekly hours of hourly-rated

L'augmentation de 0.3% dans les transports, communications, autres services publics de même que des gains dans l'entretien des ponts et des ponts, les communications et les transports par camion ont compensé les pertes dans les transports par eau et services. L'augmentation de 0.7% dans les finances, assurances et immobilier traduit de généralisés dans les établissements financiers, les assurances et l'immobilier.

Dans la *région de l'Atlantique*, l'indice composite de l'emploi a augmenté de 0.7% en juillet; les gains enregistrés à Terre-Neuve, Nouveau-Brunswick ont plus que compensé les baisses observées à l'Île-du-Prince-Édouard et la Nouvelle-Écosse. L'emploi a augmenté dans les mines de charbon, le bâtiment, et le commerce de gros et de détail. Des gains quelque peu compensatoires ont été enregistrés dans les restaurants et tavernes.

L'indice composite de l'emploi au *Québec* a légèrement augmenté de juin à juillet. On a enregistré des augmentations dans le transport, le papier et produits connexes, l'entretien des ponts et des ponts, les transports par camion, les assurances et l'immobilier, l'imprimerie et produits connexes et les produits du bois. Ces gains ont été compensés par des baisses dans le bâtiment, le génie civil, les transports par eau et services, les appareils et matériel électriques et le vêtement.

En *Ontario*, l'indice composite de l'emploi dans les activités économiques a progressé de 1.1% en juillet. C'est l'assemblage des véhicules automobiles qui a enregistré la plus grande partie de l'augmentation. De plus, l'indice de l'emploi a progressé d'une façon appréciable dans le papier et produits connexes, le commerce de détail, le génie civil, les mines (métaux), les établissements financiers ainsi que dans tous les éléments des transports, communications et services publics.

L'indice composite pour la *région des Prairies* s'est accru de juin à juillet; on a observé des augmentations dans les trois provinces. Les gains les plus importants ont été enregistrés dans le commerce de détail (surtout les magasins à rayons), le bâtiment, les biens durables, les aliments et boissons.

En *Colombie-Britannique*, la baisse de 6.6% de l'indice composite de l'emploi dans les activités économiques en juillet est surtout attribuable aux conflits de travail généralisés. On a enregistré des baisses de l'ordre de 32.6% dans le forage (32.6%), dans les produits du bois (20.6%) et dans les produits connexes (57.6%). Des baisses ont également été enregistrées dans les transports par eau et services, le génie civil et le bâtiment; l'augmentation dans le commerce traduit principalement des gains dans le détail.

### Gains et heures de travail

*Après désaisonnalisation*, les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont augmenté de 1.3% en juillet. Des progressions ont été enregistrées dans toutes les divisions de l'activité économique à l'exception du forage, et dans toutes les régions, à l'exception de la Colombie-Britannique.

*Sans désaisonnalisation*, les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.0% pour passer à \$205.16. Toutes les provinces à l'exception de la Colombie-Britannique ont contribué à l'augmentation globale.

Dans le *forage*, les gains hebdomadaires moyens ont subi une baisse de 8.4% pour s'inscrire à \$234.08, ce qui traduit principalement la diminution des heures rémunérées en Colombie-Britannique et au Québec.

Les gains hebdomadaires moyens dans les *mines* ont augmenté de \$273.61 en juin à \$276.23 en juillet. Des progressions ont été signalées pour les métaux, les éléments autres que les métaux et

arnings remained unchanged at 39.2, while average hourly earnings climbed 8 cents to \$6.52.

*manufacturing*, there was virtually no change in average earnings as slight gains in non-durables balanced similar losses in durables. Average weekly hours dropped from 38.5 in June to 38.2 in July. Average hourly earnings advanced from \$5.07 to \$5.10.

Average weekly earnings in *construction* rose 2.8% in July to \$296.70. Widespread gains were recorded in both building and engineering. Average weekly hours increased 2.0% largely reflecting the engineering component, while the 1.2% rise in average earnings largely reflected gains in the building component.

The 1.2% advance in *transportation, communication and other services* largely reflected gains in transportation, especially water and services, railway transport, and urban transit. Average earnings in *trade* rose 1.8% to \$164.44 mainly reflecting advances in the retail component.

In *finance, insurance and real estate*, average weekly earnings rose from \$193.39 to \$195.62 principally as the result of gains in insurance and real estate. The 2.0% advance in average weekly earnings was mainly in recreational and personal services.

liés aux mines. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés est resté le même (39.2), alors que les gains horaires moyens augmentaient de 8 cents pour atteindre \$6.52.

Dans les *industries manufacturières*, les gains hebdomadaires moyens n'ont pratiquement pas varié, alors que de légères augmentations enregistrées pour les biens non durables ont compensé de légères diminutions signalées pour les biens durables. Le nombre moyen d'heures par semaine a fléchi, passant de 38.5 en juin à 37.9 en juillet. Les gains horaires moyens ont progressé, passant de \$5.07 à \$5.10.

Les gains hebdomadaires moyens dans la *construction* ont progressé de 2.8% en juillet pour s'établir à \$296.70. Des accroissements généralisés ont été enregistrés dans le bâtiment et le génie civil. Le nombre moyen d'heures par semaine a augmenté de 2.0% traduisant, dans une large mesure, les gains enregistrés dans le génie civil, alors que l'augmentation de 1.2% des gains horaires moyens traduit en grande partie la progression dans le bâtiment.

La progression de 1.2% dans les *transports, communications et autres services publics* traduit principalement les augmentations enregistrées dans l'élément des transports, en particulier dans les transports par eau et services, les transports ferroviaires et les transports urbains. Dans le *commerce*, les gains hebdomadaires moyens ont progressé de 1.8% pour atteindre \$164.44, principalement les augmentations généralisées dans l'élément du commerce de détail.

Dans les *finances, assurances et immeuble*, les gains hebdomadaires moyens ont augmenté, passant de \$193.39 à \$195.62, surtout par suite des progressions réalisées dans les assurances et l'immeuble. La progression de 2.0% des gains hebdomadaires moyens dans les *services* a surtout été enregistrée dans les services récréatifs et les services personnels.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

Estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 du Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

**ORIGINAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)**  
**based on the 1960 Standard Industrial Classification)**

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

**1960**

Monthly data were not published but are available on

annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

**1970**

*Employment Indexes, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.*

*Employment Indexes, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.*

*Average Weekly Earnings, 1961-1969 for:*

Transportation; Highway and bridge maintenance.

*Nombre d'employés à traitement, ensemble des employés à salaire (heures déclarées), rémunération hebdomadaire des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données de ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in this report.

### Reporting Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of producing all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross profit" or "gross output" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit, though not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer than 20 employees.

### Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the figures are reduced to one week's proportion of the totals. The fractions of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the month. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the month. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Most industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household services, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en vue de la mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport d'établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique l'emploi annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1972(1)

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux, de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

### Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each

### Classification géographique

Les unités de déclaration sont affectées à une province, (selon la définition établie par le recensement de la population) à une région urbaine. Les données de Terre-Neuve, du Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former les totaux pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont basées sur le concept du marché du travail; les régions

urban area is available from the Monthly Employment, and Labour Income Section. The reporting units not located in the urban area are included in county, provincial and totals.

## Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not usually shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" in the main tables refer to this manual. The tables contain a number of groupings not found in the Standard Industrial Classification. These include:

**Industrial composite (031-899)** - The sum of the industries included in the survey. (see Coverage)

**Durable goods manufacturing (durable)** - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

**Non-durable goods manufacturing (non-dur)** - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

**Building (404,421)** - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

**Engineering (406-409)** - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

**Ensemble des industries (031-899)** - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

**Manufactures, biens durables (durable)** - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

**Manufactures, biens non durables (non dur.)** - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

**Bâtiment (404, 421)** - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

**Genie civil (C.T.I. 406-409)** - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Employment data represent all employees on the payrolls of units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons performing remunerative volunteer work, pensioners, home workers,

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les employés réguliers à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures travaillées pendant la période de paye.

Par exemple, une personne travaillant une partie de la période et en chômage ou en grève le reste de la période, est comptée comme employée. Les employés qui ne sont pas rémunérés pour la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les employés.

### Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont ceux qui travaillent effectivement à la production et à des opérations assimilées, y compris le personnel d'entretien, d'entrepôt et de livraison, de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les employés des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées à partir des données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

### Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de la direction, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'usine sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ou à la tâche, la rémunération du travail aux pièces et les commissions régulières, au rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; il ne s'agit pas non plus du coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les versements à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés.

present publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was sole.

## Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 method of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue no. 72-202).

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom details are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

## Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimates, because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised annual averages; these data are contained in catalogue no. 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf le contraire) les colonnes laissées en blanc dans le cas de traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

## First Estimates(1) – September 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed a slight rise from August to September. Declines in forestry, mining, manufacturing and trade offset rises in the remaining industry divisions. There were reductions in employment in Ontario and British Columbia; the remaining regions showed gains.

Unadjusted for seasonal variations, average weekly earnings at Canada industrial composite level rose 0.8%. Gains were recorded in all industry divisions except transportation, communication and utilities, and trade. All five regions posted increases.

## Preliminary Data(1) – August 1975

## Employment – Seasonally-adjusted

Preliminary data for August 1975 showed a 0.5% drop in the Canada industrial composite employment index. Employment was down in all industry divisions except construction, trade, and finance, insurance and real estate.

The 0.2% decrease in manufacturing largely reflected declines in vehicle assembling; these declines were mainly due to changes in the manner of recording the preceding month employment employment during the model changeover period. In addition, there were losses in employment in wood products, non-metallic mineral products and primary metal industries. Gains were recorded in food and beverages, electrical products, paper and allied industries, machinery, and textile products.

Employment in transportation, communication and other utilities rose 1.1% mainly reflecting industrial disputes in urban transit and other services. The 2.9% decrease in mining was largely the result of industrial disputes in metals and layoffs in coal. Services showed a decline as losses in business and miscellaneous services more than offset rise in hotels, restaurants and taverns. Forestry declined as layoffs in British Columbia more than counterbalanced gains in the Atlantic Provinces.

Construction employment rose 1.1% from July to August with gains in both the building and engineering components. The 0.2% rise in finance, insurance and real estate reflected rises in financial services. Employment in trade showed virtually no change over the month as both wholesale and retail increased only slightly.

Note on Statistical Presentation under Concept and Methods at the back of this publication

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

## Premières estimations(1) – Septembre 1975

La première estimation désaisonnalisée de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961=100) a accusé un léger fléchissement entre août et septembre. Des baisses dans le forestage, les mines, les manufactures et le commerce ont compensé les gains enregistrés dans les autres divisions de l'activité économique. L'emploi a baissé en Ontario et en Colombie-Britannique, et augmenté dans les autres régions.

Les gains hebdomadaires moyens non désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.8%. On a enregistré des gains dans toutes les divisions de l'industrie sauf le transport, les communications et autres services et le commerce. Les cinq régions ont accusé des augmentations.

## Données provisoires(1) – Août 1975

## Emploi – chiffres désaisonnalisés

Les données provisoires pour août 1975 révèlent un recul (0.5%) de l'indice composite de l'emploi dans les activités économiques du Canada. L'emploi a baissé dans toutes les divisions de l'industrie sauf la construction, le commerce, et la finance, l'assurance et l'immeuble.

Dans le secteur manufacturier, la baisse de 0.2% était en grande partie imputable à l'industrie de l'assemblage des voitures automobiles par suite, principalement, à des changements dans la méthode d'enregistrer l'emploi du mois précédent durant la période de changement de modèle. En outre, l'emploi a baissé dans les produits du bois, les produits minéraux non métalliques et les métaux (formes primaires). On a observé des augmentations dans les aliments et boissons, les produits électriques, les papiers et produits connexes, la machinerie et les produits du textile.

La baisse de 1.1% de l'emploi dans le transport, les communications et autres services traduit principalement les conflits de travail dans le transport urbain et les services téléphoniques. Une grande part du recul de 2.9% dans les mines métalliques imputable aux conflits de travail dans le secteur minier et les congédiements dans le secteur du charbon. Dans le secteur des services, on a observé un fléchissement de 0.3% puisque les baisses constatées dans les services des entreprises et les services récréatifs ont neutralisé les gains enregistrés dans les restaurants, les hôtels et les tavernes. L'emploi dans le forestage a baissé de 1.0% puisque les congédiements en Colombie-Britannique ont fait plus que compensé les hausses dans la région de l'Atlantique.

L'emploi dans la construction a progressé de 1.1% entre juillet et août, des augmentations étant observées dans le bâtiment et le génie civil. La hausse de 0.2% dans la finance, l'assurance et l'immeuble est attribuable aux établissements financiers. L'emploi dans le commerce n'a accusé aucun changement au cours du mois, le commerce de gros et le commerce de détail n'ayant augmenté que très légèrement.

- (1) Voir Présentation statistique sous concepts et méthodes, à la fin de la présente publication.
- (2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

In the *Atlantic Region*, the industrial composite index of employment rose 0.5% with gains in all provinces except Nova Scotia. Employment increased in non-durables, personal services, logging, forestry services and retail trade. Somewhat offsetting declines occurred in communication, mineral fuels and building.

The *Quebec* industrial composite employment index fell 1.0% from July to August. The largest factors of this decline were the industrial disputes in urban transit and the layoffs in motor vehicles. Additional decreases in machinery, non-metallic mineral products, and highway and bridge maintenance were balanced by gains in non-durables manufacturing, building construction and retail trade.

In *Ontario*, employment dropped 0.6% at the industrial composite level in August. For the most part, this decline reflected the decrease in motor vehicle assembling. Mining employment dropped more than 10% owing to industrial disputes in metals. In addition, there were decreases recorded in retail trade, primary metal industries and miscellaneous manufacturing industries, while building, transportation, machinery, electrical products and wholesale trade showed advances.

The industrial composite employment index for the *Prairie Region* declined only slightly from July to August. Gains in employment in durable goods manufacturing, building construction, and hotels, restaurants and taverns were virtually balanced by declines in logging, food and beverages, department stores, and business and miscellaneous services.

In *British Columbia* employment fell 1.0% at the industrial composite level in August. Further layoffs in logging and wood products associated with the on going industrial disputes, plus declines in building and in miscellaneous services were the primary factors underlying this decrease. A gain in non-durables manufacturing reflected the termination of industrial disputes in fish products.

## Earnings and Hours

*Seasonally-adjusted*, average weekly earnings at the Canada industrial composite level rose 0.7% in August. There were advances in all industry divisions and in all regions except the Atlantic Region.

*Unadjusted for seasonal variations*, average weekly earnings for the national industrial composite rose 0.4% to \$206.05. All regions except the Atlantic Region participated in the overall rise.

In *forestry*, average weekly earnings advanced 4.4% to \$239.53 mainly reflecting increases in hours paid in Quebec and British Columbia.

Average weekly earnings in *mining* advanced from \$278.24 in July to \$281.68 in August. Average weekly hours of hourly-rated wage-earners remained virtually unchanged as declines in services incidental to mining balanced rises in mineral fuels. Average hourly earnings rose 4 cents to \$6.61 mainly reflecting gains in mineral fuels and non-metals.

In *manufacturing*, average weekly earnings increased 0.5% to \$213.60. Average weekly hours rose to 38.3 from 38.1, while average hourly earnings remained unchanged at \$5.07. Durable goods advanced nearly three dollars with gains in both hours paid and hourly

L'indice composite a progressé de 0.5% dans la *région de l'Atlantique*, car des gains ont été enregistrés dans toutes les provinces de la Nouvelle-Écosse. Des augmentations de l'emploi ont été notées dans les biens non durables, les services personnels, l'abattage, les services forestiers et le commerce de détail. Des baisses compensatoires ont été notées dans les communications, combustibles minéraux et construction.

Au *Québec*, l'indice composite de l'emploi dans les activités industrielles a baissé de 1.0% entre juillet et août à cause principalement de congédiements dans l'industrie automobile et les conflits de travail dans le transport urbain. D'autres baisses dans la machinerie, les produits non métalliques, l'entretien des chemins et des ponts ont été compensées par des gains dans la fabrication de biens non durables, le bâtiment et le commerce de détail.

En *Ontario*, l'indice composite de l'emploi dans les activités économiques a baissé de 0.6% en août. Cette baisse est attribuée en grande partie au recul observé dans l'assemblage des voitures automobiles. L'emploi dans le secteur minier a baissé de plus de 10% en raison de conflits de travail dans les industries métalliques. De plus, on a observé des baisses dans le commerce de détail, les industries métalliques (primaires) et diverses industries manufacturières, tandis que le bâtiment, le transport, la machinerie, les produits électriques et le commerce de détail ont progressé.

L'indice composite pour la *région des Prairies* a fléchi légèrement entre juillet et août. Les hausses dans l'emploi dans la fabrication de biens durables, le bâtiment et les hôtels, restaurants et tavernes ont été en partie contrebalancées par les baisses dans l'abattage, les services forestiers, les boissons, les magasins à rayons et les services extérieurs des entreprises et les services divers.

En *Colombie-Britannique*, une baisse de 1.0% a été observée en juillet et août dans l'indice composite de l'emploi. D'autres baisses dans l'abattage et les produits du bois reliées à des conflits de travail ainsi que les baisses notées dans le bâtiment et les services ont été compensées par une bonne part de cette baisse. Un règlement de conflit de travail dans les produits de la pêche s'est traduit par une augmentation dans la fabrication des produits non durables.

## Gains et heures de travail

En août, les gains hebdomadaires moyens, *désaisonnalisés*, à l'ensemble des activités économiques du Canada ont atteint un niveau de 0.7%. Des progressions ont été enregistrées dans toutes les divisions de l'activité économique et dans toutes les régions, à l'exception de l'Atlantique.

Les gains hebdomadaires moyens, *non désaisonnalisés*, à l'ensemble des activités économiques du Canada ont atteint un niveau de 0.4%. On a observé cette augmentation générale dans toutes les régions, à l'exception de celle de l'Atlantique.

Dans le *forêtage*, les gains hebdomadaires moyens se sont élevés de 4.4%, pour s'inscrire à \$239.53, en raison du plus grand nombre d'heures rémunérées au Québec et en Colombie-Britannique.

Les gains hebdomadaires moyens dans les *mines* sont passés de \$278.24 en juillet à \$281.68 en août. Le nombre moyen d'heures travaillées par des ouvriers payés à l'heure n'a pratiquement pas changé étant donné que des baisses dans les services associés à l'extraction ont été contrebalancées par les augmentations dans les combustibles minéraux. Les gains quotidiens moyens se sont chiffrés à \$6.61, soit une augmentation de 4 cents, en raison des gains enregistrés dans les combustibles minéraux et non métalliques.

Dans le *secteur manufacturier*, les gains hebdomadaires moyens ont atteint \$213.60, en hausse de 0.5%. Le nombre moyen d'heures travaillées par semaine est passé de 38.1 à 38.3 tandis que les gains hebdomadaires moyens se sont maintenus à \$5.07. Dans les biens durables, un

ings; non-durable goods declined slightly as decreases in hourly ings offset rises in hours paid.

Average weekly earnings in *construction* showed a 1.9% rise in ust to \$301.28 with widespread increases in both building and neering. Average weekly hours declined slightly, while average ly earnings rose from \$7.43 to \$7.59.

There was only a 0.3% advance in average weekly earnings in *portation, communication and utilities* in August as declines in portation offset, for the most part, rises in the remaining onents. Average weekly earnings in *trade* declined 0.6% reflect-easonal decreases in retail trade.

Average weekly earnings in *finance, insurance and real estate* ed 0.6% to \$194.12 as decreases in insurance and real estate han offset gains in financial institutions. In *service*, average ly earnings rose 1.1% as gains occurred in all components except al services.

de près de trois dollars est résultée du double relèvement des heures payées et des gains horaires, les biens non durables ont fléchi quelque peu, des baisses dans les gains horaires ayant compensé l'augmentation des heures payées.

Les gains hebdomadaires moyens dans la *construction* ont progressé de 1.9% en août pour s'inscrire à \$301.28, par suite des augmentations générales notées dans le bâtiment et le génie civil. Les gains hebdomadaires moyens ont légèrement fléchi tandis que les gains horaires moyens sont passés de \$7.43 à \$7.59.

Dans le *transport, les communications et autres services d'utilité publique* on a observé un progrès de 0.3% seulement dans les gains hebdomadaires moyens en août, alors que des baisses dans le transport compensaient, en grande partie, les hausses dans les autres secteurs. Les gains hebdomadaires moyens dans le *commerce* ont fléchi de 0.6% en raison des reculs saisonniers dans le commerce de détail.

Les gains hebdomadaires moyens dans les *finances, les assurances et l'immeuble* ont accusé un recul de 0.6% pour atteindre \$194.12, les baisses constatées dans les assurances et l'immeuble ayant neutralisé les augmentations notées dans les institutions financières. Dans les *services*, les gains hebdomadaires moyens ont progressé de 1.1%, des hausses ayant été notées dans tous les secteurs à l'exception des services personnels.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relate to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special man calculation has been made in order to retain this table because of its extensive usage. An approximation of the calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue 62-002. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 du Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

**STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)**  
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

**1960**

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

**1970**

*Employment Indexes*, 1961-1964, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

*Employment Indexes*, 1965-1967, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

*Average Weekly Earnings*, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Ontario: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

*Average Weekly Earnings*, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

*Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners* - 1961-1967 for:

**DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)**  
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).

4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

**A. 1957-1960**

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

**B. 1961-1970**

*Indices de l'emploi*, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

*Indices de l'emploi*, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

*Gains hebdomadaires moyens*, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

*Gains hebdomadaires moyens*, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. ## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and sent the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

### Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

### Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The number of the fractions used in calculating these weekly equivalents is 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The number of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the month. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage de l'emploi, tel qu'il ressort de l'enquête, en pourcentage de l'estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux et l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

## Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each

## Classification géographique

Les unités de déclaration sont affectées à une province, à un lieu, à une région urbaine. Les données de Terre-Neuve, du Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, du Saskatchewan et de l'Alberta sont additionnées pour former la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des régions urbaines. Les définitions employées pour les autres régions sont fondées sur le concept du marché du travail; les régions

ted urban area is available from the Monthly Employment, Wages and Labour Income Section. The reporting units not located in the unincorporated urban area are included in county, provincial and national totals.

## Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not regularly shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" is given in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification.

*Industrial composite (031-899)* - The sum of the industries included in the survey. (see Coverage)

*Durable goods manufacturing (durable)* - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

*Non-durable goods manufacturing (non-dur)* - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

*Building (404,421)* - The sum of general contractors (S.I.C. 1500-1599) and special trade contractors (S.I.C. 421).

*Engineering (406-409)* - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

## Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons on non-remunerative volunteer work, pensioners, home workers,

ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

*Ensemble des industries (031-899)* - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

*Manufactures, biens durables (durable)* - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

*Manufactures, biens non durables (non dur.)* - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

*Bâtiment (404, 421)* - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

*Genie civil (C.T.I. 406-409)* - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

### Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, y compris le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livriers, les vendeurs itinérants, les commis de magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire, suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

### Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes de rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires de l'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés.

present publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was able.

## Numbers

Index numbers are calculated by dividing the current month's payment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all payment reported by establishments that meet our size criteria in current period. Base year employment consists of the employment establishments that had 20 or more employees in any month of The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the cycle, and irregular components of the time series. The X-11 of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-202).

## Hours

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom details are reported. It should be noted that total hours include not only hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the monthly data, with the exception of those shown as monthly (p); the latter are based on monthly averages.

## Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimates (the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger errors are calculated immediately and appear in the historical statistical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the statistical tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf contraire) les colonnes laissées en blanc dans le cas des emplois ouvriers indiqués séparément, signifient que les données relatives aux heures sont enregistrées et disponibles.

## First Estimates(1) – October 1975

Seasonally-adjusted, the first estimate of the Canada industrial (2) index of employment (1961 = 100) dropped 1.2% from September to October. For the most part, this decline reflected the decline of industrial disputes in the post office component of transportation, communication and other utilities. Employment also declined in forestry, construction, and finance, insurance and real estate. The remaining industry divisions recorded gains.

When adjusted for seasonal variations, average weekly earnings rose 1.5% at the Canada industrial composite level in October; this compares to a seasonally-adjusted gain of 1.5%. Increases were recorded in all industry divisions and in all five regions. The particularly large increase in transportation, communication and other utilities (5.0%) mainly reflected the reduction in employment in post office earnings are lower than the industry division average.

## Preliminary Data(1) – September 1975

Index (seasonally-adjusted)

Preliminary data for September 1975 showed virtually no change in the Canada industrial composite employment index. Employment in manufacturing, trade and forestry balanced the losses in the remaining industry divisions.

The 0.8% drop in manufacturing employment was concentrated in British Columbia and Ontario. Paper and allied industries and products declined considerably owing to industrial disputes. There were also widespread decreases in food and beverages, chemical products, among others. These losses were somewhat offset by gains in transportation equipment, machinery, and chemicals and other products.

Employment in trade was down 0.4% from August to September. Broad gains in wholesale were more than offset by declines in the large drop in food stores reflected industrial disputes in British Columbia. The 4.9% decrease in forestry employment mainly reflected layoffs in Ontario associated with the industrial disputes in allied industries.

The 1.2% rise in employment in transportation, communication and other utilities mainly reflected the increases in urban transit and the resolution of industrial disputes. These gains were offset by declines in electric power and railway transport. Employment advanced 1.2% from August to September with

Source: Statistical Presentation under Concepts and Methods of the 1961 Census.

The Canada Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the

## Premières estimations(1) – Octobre 1975

Après désaisonnalisation, la première estimation(1) de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961 = 100) a enregistré une baisse de 1.2% entre septembre et octobre. Cette baisse est en grande partie attribuable aux conflits du travail à l'échelle nationale dans la composante des postes de la division des transports, communications et autres services d'utilité publique. L'emploi a également diminué dans le forestage, la construction, et les finances, assurances et immeubles. On a observé des augmentations dans les autres divisions de l'activité économique.

Sans désaisonnalisation, les gains hebdomadaires moyens ont augmenté de 1.8% en octobre au niveau de l'ensemble des activités économiques du Canada, ce qui représente une progression désaisonnalisée de 1.5%. Des augmentations ont été observées dans toutes les divisions de l'activité économique ainsi que dans les cinq régions. L'augmentation particulièrement marquée dans les transports, communications et autres services d'utilité publique (5.0%) reflète la diminution de l'emploi dans les postes où les gains sont inférieurs à la moyenne des divisions de l'activité économique.

## Données provisoires(1) – Septembre 1975

Emploi (Chiffres désaisonnalisés)

Les données provisoires pour septembre 1975 n'indiquent pratiquement aucun changement dans l'indice composite de l'emploi dans les activités économiques du Canada. Les baisses de l'emploi dans les industries manufacturières, le commerce et le forestage ont neutralisé les augmentations dans les autres divisions de l'activité économique.

La baisse de 0.8% dans les industries manufacturières a surtout été observée en Colombie-Britannique et en Ontario. On a enregistré une diminution considérable dans l'industrie du papier et produits connexes par suite de conflits du travail. Il y a également eu des baisses généralisées, notamment dans l'industrie des aliments et boissons et celle des appareils électriques. Ces pertes ont été quelque peu compensées par des gains dans le matériel de transport, la machinerie et l'industrie chimique et produits connexes.

L'emploi dans le commerce a régressé de 0.4% entre août et septembre. Les gains généralisés dans le commerce de gros ont été plus que compensés par les baisses dans le commerce de détail. Il y a eu une baisse importante dans les magasins d'alimentation par suite de conflits du travail en Colombie-Britannique. La diminution de 4.9% de l'emploi dans le forestage est en grande partie attribuable aux licenciements en Ontario et aux conflits du travail dans l'industrie du papier et produits connexes.

L'augmentation de 1.2% dans les transports, communications et autres services d'utilité publique reflète surtout les augmentations dans le transport urbain par suite du règlement des conflits du travail. Ces gains ont été en partie neutralisés par des baisses dans l'électricité et les transports ferroviaires. L'emploi dans les services a progressé de 1.2% entre août et

- (1) Voir la note sur la présentation statistique sous la rubrique "Concepts et méthodes" à la fin de la présente publication.
- (2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations des employeurs ayant vingt (20) salariés ou plus à leur service au cours d'un mois quelconque de l'année.

gains in the recreational, business and miscellaneous components outweighing declines in hotels, restaurants and taverns.

Employment in finance, insurance and real estate rose 0.6% with gains being recorded in all five regions. This rise was concentrated in financial institutions. Construction employment rose 0.3% over the month as widespread advances in the building component outweighed widespread declines in the engineering component. The slight rise in mining employment largely reflected gains in metals and non-metals.

In the *Atlantic Region*, the industrial composite index rose slightly as gains in Newfoundland and New Brunswick were offset by declines in Nova Scotia and Prince Edward Island. Employment advanced in metals mining, fish products, shipbuilding and repairing, and building construction. There were declines in water transport and services, electric power, retail trade, and hotels, restaurants and taverns.

The *Quebec* industrial composite employment index advanced 1.0% from August to September. The largest single element in this gain was the resolution of industrial disputes in urban transit. Other increases were recorded in food and beverages, transportation equipment, machinery, chemicals and chemical products, retail trade, and business and miscellaneous services. Somewhat offsetting declines occurred in paper and allied industries and in both building and engineering construction.

In *Ontario*, employment dropped 0.5% at the industrial composite level in September. For the most part, this decline reflected the reduction in employment in paper and allied industries due to industrial disputes, and the losses in forestry due to associated layoffs. There were in addition declines in employment in electrical products, iron and steel mills, transportation, and hotels, restaurants and taverns.

The industrial composite employment index for the *Prairie Region* showed a 0.9% rise with increases in all three provinces. Gains were recorded in durable goods, building, engineering, transportation, retail trade, financial institutions, insurance and real estate and business services. Somewhat offsetting declines occurred in non-durable goods.

In *British Columbia*, the industrial composite employment index continued to decline for the third successive month. Further reductions in wood products and paper and allied industries caused most of the drop in manufacturing employment. The decrease in trade mainly reflected industrial disputes in food stores. Service employment advanced as gains in miscellaneous services more than balanced declines in hotels, restaurants and taverns.

## Earnings and Hours

*Seasonally-adjusted*, average weekly earnings at the Canada industrial composite level rose slightly in September. Increases were recorded in all industry divisions except forestry and transportation, communication and other utilities. Declines in Quebec and Ontario almost offset rises in the remaining regions.

septembre dans les composantes des services récréatifs, des services et services commerciaux, compensant la régression dans les hôtels, restaurants et tavernes.

L'emploi dans les finances, assurance et immeuble a augmenté de 0.6%; des gains ont été enregistrés dans les cinq régions. On a observé cette augmentation dans les établissements financiers. Dans la construction a augmenté de 0.3% en septembre, la progression généralisée dans la composante du bâtiment ayant compensé les baisses généralisées dans le génie civil. L'augmentation observée dans les mines métalliques et non métalliques s'est traduite par une légère augmentation dans les mines.

Dans la *région de l'Atlantique*, l'indice composite de l'ensemble des activités économiques a enregistré une légère hausse, les gains à Terre-Neuve et au Nouveau-Brunswick ayant neutralisé les baisses à Nouvelle-Écosse et dans l'Île-du-Prince-Édouard. L'emploi a augmenté dans les mines métalliques, l'industrie du poisson, la construction, la réparation de navires, et le bâtiment.

L'indice composite de l'emploi au *Québec* a progressé de 1.0% en août et septembre. Le principal facteur de cette augmentation a été la résolution des conflits du travail dans le transport urbain. En septembre, d'autres augmentations ont été enregistrées dans les aliments et boissons, de transport, la machinerie, l'industrie chimique et des produits de détail, et les services commerciaux et divers. Dans l'industrie du papier et produits connexes, et dans le génie civil ont quelque peu neutralisé ces augmentations.

En *Ontario*, l'indice composite de l'emploi dans les activités économiques a fait état d'une diminution de 0.5% en septembre. Cette baisse est en grande partie attribuable à la réduction de l'emploi dans l'industrie du papier et produits connexes entraînée par des conflits du travail, et aux baisses dans le forage imputables aux licenciements dans ce secteur. En outre, des baisses ont été observées dans les produits électriques, l'industrie du fer et de l'acier, les transports et les hôtels, restaurants et tavernes.

L'indice composite de l'emploi dans la *région des Prairies* a enregistré une hausse de 0.9%; des augmentations ont été observées dans les trois provinces. Des gains ont été signalés dans les biens de consommation, le bâtiment, le génie civil, les transports, le commerce de détail, les services financiers, l'assurance et l'immeuble, et les services commerciaux. Des baisses quelque peu compensatoires ont été observées dans les biens non durables.

En *Colombie-Britannique*, l'indice composite de l'ensemble des activités économiques a fait état d'une baisse pour le troisième mois consécutif. De nouvelles baisses dans l'industrie du bois, du papier et produits connexes ont été le principal facteur de la baisse de l'emploi dans les industries manufacturières. La baisse dans le commerce de détail était surtout attribuable aux conflits du travail dans les magasins. Il y a eu augmentation de l'emploi dans les services enregistrés dans les services divers ayant plus que neutralisé les baisses dans les hôtels, restaurants et tavernes.

## Gains et heures de travail

*Après désaisonnalisation*, les gains hebdomadaires au niveau de l'ensemble des activités économiques du Canada ont enregistré une légère hausse en septembre. Il y a eu augmentation dans toutes les divisions de l'activité économique à l'exception du forage et des communications et autres services d'utilité publique. Les baisses au Québec et en Ontario ont presque neutralisé les hausses dans les autres régions.

*Unadjusted for seasonal variations*, average weekly earnings national industrial composite advanced 0.8% to \$207.94. All divisions participated in the overall rise.

In *forestry*, average weekly earnings fell 0.9% to \$240.23 reflecting widespread reductions in hours paid.

Average weekly earnings in *mining* rose from \$281.64 in August to \$287.30 in September as gains were recorded in all divisions except metals. Average weekly hours of hourly rated workers increased from 39.4 to 39.8, while average hourly earnings showed a 7 cents rise to \$6.70.

In *manufacturing*, average weekly earnings rose 2.0% to \$218.31. Gains occurred in all twenty major components and in all divisions. Average weekly hours rose 1.3% to 38.9 and average earnings increased 1.2% to \$5.14.

Average weekly earnings in *construction* jumped 2.4% in September to \$310.97 mainly reflecting increases in the engineering division. Average weekly hours showed no change, while average earnings advanced from \$7.67 to \$7.84.

The 1.0% decline in average weekly earnings in *transportation, communication and other utilities* reflected decreases in the transportation component. Average weekly earnings in *trade* fell 0.3% to \$162.77, while earnings in retail more than offset rises in wholesale.

Average weekly earnings in *finance, insurance and real estate* rose from \$193.85 to \$195.81 with gains in both components. In *finance*, average weekly earnings showed virtually no change as gains in *insurance* services were offset by declines in the remaining divisions.

#### Year-to-date

The average of the monthly employment indexes for the first six months of 1975, compared with the same period for 1974, showed a 0.9% decline in the industrial composite employment index. This represents a marked decrease from the 0.4% decline in the first six months of the year. All industry divisions showed declines in *finance, insurance and real estate*, and service performed worse in the third quarter than during the preceding two.

Employment in *forestry* fell 8.1% over the year compared with a 1.7% after the first six months. For the most part, this decline reflected industrial disputes in British Columbia. Employment in *mining* was down 1.4% compared with 1974 mainly because of the continuation of industrial disputes in asbestos in the West.

In *manufacturing* employment during the first nine months of 1975 was down 5.7% from the comparable period for 1974. Decreases were recorded in sixteen out of twenty major groups; only rubber, printing and publishing, petroleum and coal products and food and chemical products showed gains. Decreases in excess of

*Sans désaisonnalisation*, les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.8%, passant à \$207.94. Les cinq régions ont contribué à l'augmentation générale.

Les gains hebdomadaires moyens dans le *forestage* ont diminué de 0.9% pour s'établir à \$240.23, surtout en raison de la réduction généralisée du nombre d'heures rémunérées.

Les gains hebdomadaires moyens dans les *mines* ont augmenté, passant de \$281.64 en août à \$287.30 en septembre; des gains ont été enregistrés dans toutes les composantes à l'exception des mines métalliques. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a augmenté, passant de 39.4 à 39.8, alors que les gains horaires moyens ont augmenté de 7 cents pour passer à \$6.70.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 2.0% pour passer à \$218.31. Des gains ont été enregistrés dans les vingt principales composantes et dans les cinq régions. Le nombre moyen d'heures hebdomadaires travaillées s'est accru de 1.3% pour passer à 38.9 et les gains horaires moyens ont augmenté de 1.2% pour passer à \$5.14.

Les gains hebdomadaires moyens dans la *construction* ont augmenté de 2.4% en septembre pour passer à \$310.97 par suite des augmentations dans la composante du génie civil. Le nombre moyen d'heures hebdomadaires est demeuré inchangé, tandis que les gains horaires moyens sont passés de \$7.67 à \$7.84.

La baisse de 1.0% des gains hebdomadaires moyens dans les *transports, communications et autres services d'utilité publique* a reflété les diminutions dans la composante des transports. Les gains horaires moyens dans le *commerce* ont diminué de 0.3% pour s'établir à \$162.77, des baisses enregistrées dans le commerce de détail ayant de loin neutralisé les augmentations dans le commerce de gros.

Les gains hebdomadaires moyens dans les *finances, assurances et immobilier* ont augmenté de 1.0%, passant de \$193.85 à \$195.81; des hausses ont été enregistrées dans les deux composantes. Dans les *services*, les gains hebdomadaires moyens sont demeurés pratiquement inchangés, les augmentations dans les services commerciaux ayant été neutralisées par des baisses dans les autres composantes.

#### Données cumulatives pour l'année

##### Emploi

Par rapport à la période correspondante de 1974, la moyenne des indices mensuels de l'emploi pour les neuf premiers mois de 1975 a diminué de 0.9% au niveau de l'ensemble des activités économiques du Canada. Cela représente une baisse marquée par rapport à la diminution de 0.4% observée après les six premiers mois de l'année. La situation dans toutes les divisions de l'activité économique, à l'exception des finances, assurances et immobilier, s'est détériorée au troisième trimestre par rapport aux deux trimestres précédents.

L'emploi dans le *forestage* a diminué de 8.1% en 1975, alors qu'il avait baissé de 1.7% après les six premiers mois. Cette nouvelle baisse est en grande partie attribuable aux conflits du travail en Colombie-Britannique. L'emploi dans les mines a diminué de 1.4% par rapport à 1974, reflétant les conflits du travail qui ont persisté dans les mines d'amiante au Québec.

Par rapport à la période correspondante de 1974, l'emploi dans les industries manufacturières a diminué de 5.7% au cours des neuf premiers mois de 1975. Des baisses ont été enregistrées dans seize des vingt principaux groupes; on a observé des hausses uniquement dans l'industrie du caoutchouc, l'imprimerie et l'édition, l'industrie du pétrole et du

ten per cent were recorded in wood products, furniture and fixtures, and textile products.

In construction, employment was up 0.2% over the year as rises in engineering offset declines in building. The 3.0% rise in employment in transportation, communication and other utilities was concentrated in the communication and utilities components. Transportation employment advanced only 0.9% as rises in air transport and services, urban transit, and highway and bridge maintenance were somewhat offset by declines in water transport and services, and truck transport.

Employment in trade was up 2.0% reflecting widespread gains in both wholesale and retail. The 4.6% advance in finance, insurance and real estate was in both financial institutions and insurance and real estate. Service, which showed a 3.5% rise, was the only industry division to increase on a year-to-date basis from the end of the second quarter to the end of the third. Over the year, the increase was mainly in business services and personal services.

## Earnings

The average for the first nine months of 1975, compared with the same period for 1974, showed a 14.2% rise in average weekly earnings at the Canada industrial composite level. This represents a decline of .4 percentage points from the gain recorded after the first six months of the year. Provincial advances ranged from 12.8% in Ontario to 18.7% in New Brunswick.

In forestry, average weekly earnings were up 15.2% over the year; regional rises ranged from 13.0% in the Atlantic Region to 18.5% in Ontario. Average weekly earnings in mining were up 17.6%. This advance reflected an 18.3% rise in average hourly earnings and a 1.0% drop in average weekly hours.

In manufacturing, average weekly earnings recorded a 15.3% increase from the comparable period for 1974. Average hourly earnings were up 16.5% and average weekly hours decreased 1.4%. Average weekly earnings in construction exhibited a similar pattern to manufacturing as an overall advance of 15.3% was recorded; average hourly earnings increased 16.7% and average weekly hours were down 0.8%.

In transportation, communication and other utilities, average weekly earnings for the first nine months of the year were up 13.6%. Among its components, storage showed the largest advance (17.7%) and communication the smallest (11.9%). Average weekly earnings in trade rose 13.9% over the year with gains of 14.2% in wholesale and 13.8% in retail.

Finance, insurance and real estate showed the smallest industrial advance for the year-to-date (11.6%) as a 13.9% rise in financial institutions was substantially reduced by a gain of only 8.7% in insurance and real estate. In service, average weekly earnings gained 14.2% compared with 1974; the largest component increase (15.0%) was in miscellaneous services.

charbon et leurs dérivés, et l'industrie chimique et des produits. On a enregistré des diminutions supérieures à 10% dans l'industrie du meuble et les articles d'ameublement et les industries textiles.

Dans la construction, l'emploi a augmenté de 0.2%, l'année, des gains dans le génie civil ayant compensé les baisses bâtiment. L'augmentation de 3.0% de l'emploi dans les télécommunications et autres services d'utilité publique a surtout été dans les composantes des communications et services d'utilité publique. L'emploi dans les transports a progressé de 0.9% seulement, les transports aériens et auxiliaires des transports aériens, les transports urbains, l'entretien des routes et ponts ayant quelque peu compensé les baisses dans les transports par eau et les auxiliaires des transports par eau et les transports par camion.

L'emploi dans le commerce a augmenté de 2.0%, reflétant des gains généralisés dans le commerce de gros et de détail. La progression dans les finances, assurances et immobilier a été enregistrée dans les établissements financiers que dans les assurances et l'immobilier. Services, avec une hausse de 3.5%, étaient la seule division d'industrie à avoir enregistré une augmentation des chiffres pour l'année à partir de la fin du deuxième trimestre jusqu'au troisième. L'augmentation annuelle a surtout été observée dans le commerce et les services personnels.

## Gains

Par rapport à la période correspondante de 1974, la hausse des neuf premiers mois de 1975 a augmenté de 14.2% pour ce qui est des gains horaires moyens au niveau de l'ensemble des activités de l'industrie du Canada. Cela représente une baisse de .4 points par rapport à la hausse enregistrée après les six premiers mois de l'année. À l'échelle provinciale, les augmentations ont varié entre 12.8% en Ontario et 18.7% au Nouveau-Brunswick.

Dans le forestage, les gains horaires moyens ont augmenté au cours de l'année; à l'échelle régionale, les augmentations ont été de 13.0% dans la région de l'Atlantique et 18.5% en Ontario. Les gains horaires moyens dans les mines ont augmenté de 17.6%. Cela reflétait l'augmentation de 18.3% des gains horaires moyens et une baisse de 1.0% des gains hebdomadaires moyens.

Dans les industries manufacturières, les gains horaires moyens ont augmenté de 15.3% par rapport à la période correspondante de 1974. Les gains horaires moyens ont augmenté de 16.5% et les gains hebdomadaires moyens ont diminué de 1.4%. Les gains hebdomadaires moyens en construction ont affiché un comportement semblable à celui des industries manufacturières, une hausse de 15.3% ayant été enregistrée. Les gains horaires moyens se sont accrus de 16.7% et les gains hebdomadaires moyens ont diminué de 0.8%.

Dans les transports, communications et autres services d'utilité publique, les gains hebdomadaires moyens pour les neuf premiers mois de l'année ont augmenté de 13.6%. Des composantes de cette hausse, l'entreposage qui a accusé la plus forte hausse (17.7%) et les télécommunications, la plus faible (11.9%). Les gains hebdomadaires moyens en commerce se sont accrus de 13.9% au cours de l'année, des gains observés dans le commerce de gros (14.2%) et dans le commerce de détail (13.8%).

Les finances, assurances et immobilier ont enregistré une augmentation des chiffres cumulatifs pour l'année (11.6%), l'assurance ayant enregistré la plus forte hausse (13.9%), dans les établissements financiers ayant été sensiblement compensée par le faible gain de 8.7% enregistré dans les assurances et l'immobilier. Services, les gains hebdomadaires moyens ont augmenté de 14.2% par rapport à 1974; la composante qui a enregistré la hausse la plus forte (15.0%) a été les services divers.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes se rapportent au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 du Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

**STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)**  
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

**1960**

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

**1970**

*Employment Indexes, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.*

*Employment Indexes, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.*

*Average Weekly Earnings, 1961-1969 for:*

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Atlantic: Transportation, communication and other utilities; Transportation.

## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in this survey.

### Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

### Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The ratios of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in a month that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des gr établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le chiffré annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffré estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

**Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)**

**Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1972(1)**

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales des organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forage et la construction ne sont pas disponibles par province après l'année 1970.

#### Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

#### Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, si applicable, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour le recensement de la population dans le cas des dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines incluent généralement le territoire avoisinant avec le centre urbain. On peut obtenir une liste montrant le territoire inclus dans chaque région urbaine tabulée à partir du Monthly Employment,

and Labour Income Section. The reporting units not located in the populated urban area are included in county, provincial and national totals.

## Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not simply shifted from industry to industry each time its principal activity changes.

The statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and their principal products may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" in the main tables refer to this manual. The tables contain a number of groupings not found in the Standard Industrial Classification. These include:

**Industrial composite (031-899)** - The sum of the industries included in the survey. (see Coverage)

**Durable goods manufacturing (durable)** - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

**Non-durable goods manufacturing (non-dur)** - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

**Building (404,421)** - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

**Engineering (406-409)** - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibers (2012).

nt

Employment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons performing remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

**Ensemble des industries (031-899)** - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

**Manufactures, biens durables (durable)** - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

**Manufactures, biens non durables (non dur.)** - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

**Bâtiment (404, 421)** - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

**Genie civil (C.T.I. 406-409)** - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme salariés les ouvriers et tous les employés qui sont rémunérés pour leurs services qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période payée. Les *salariés réguliers à temps partiel* sont comptés parmi les salariés quel que soit le nombre d'heures qu'ils travaillent pendant la période payée.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les salariés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

### Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mode de rémunération. Les ouvriers sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions similaires à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux ouvriers dont on peut connaître le nombre d'heures de travail.

### Employés

Les employés comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la communication, les voyageurs de commerce relevant directement de l'administration, les employés de bureau, les commis et les travailleurs assimilés au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des ouvriers et des employés représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces, les commissions régulières, les primes au rendement, les primes de vieillesse, les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de pôle-emploi à la caisse d'assurance-chômage, aux régimes d'assurance-maladie à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des ouvriers et des employés. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" des salariés pris en compte ici. Ce système

present publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was able.

## Numbers

Index numbers are calculated by dividing the current month's payment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all payment reported by establishments that meet our size criteria in current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 method of the U.S. Census Bureau is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue no. 72-202).

es

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom details are reported. It should be noted that total hours include both full-time hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

## Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the current month, the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, preliminary estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimates. The higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the statistics are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger errors are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue no. 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf inconvénient contraire) les colonnes laissées en blanc dans le cas des employés et ouvriers indiqués séparément, signifient que les données relatives aux heures pour lesquels les heures sont enregistrées ne sont pas disponibles.

## First Estimates(1) – November 1975

Seasonally-adjusted, the first estimate of the Canada industrial employment index (1961 = 100) showed no change from October to November. Gains in mining, manufacturing, construction and service were balanced by declines in the remaining divisions. Employment advanced in the Prairie Region and British Columbia while declining in the other regions.

When adjusted for seasonal variations, average weekly earnings remained virtually unchanged at the Canada industrial composite level in November; on a seasonally-adjusted basis, this represents a decrease of 0.3%. Decreases in construction, trade and service offset gains in the remaining industry divisions. Quebec, the Prairie Region and British Columbia showed a decline; the Atlantic Region and Ontario advanced.

## Preliminary Data(1) – October 1975

## Seasonally-adjusted

Preliminary data for October 1975 showed a 0.4% drop in the Canada industrial composite employment index. Declines in employment in transportation, communication and other utilities, mainly in the industrial disputes in post office, overwhelmed the gains in all other industry divisions. Disregarding the decrease in the industrial disputes, the industrial composite employment index rose about 0.9%. Regarding all of the major industrial disputes (in forestry, wood products, paper and allied industries, telephone, post office, electric power and food stores), which either were commenced in October, the industrial composite employment index advanced about 0.2%.

Employment in manufacturing rose 1.2% from September to October. The increase in the durable-goods component mainly reflected the resolution of industrial disputes in wood products in British Columbia. The gain in non-durables was mainly in food and allied industries; in the latter, increases in employment followed the resolution of industrial disputes more than declines in Ontario, Quebec and the Atlantic Region, where industrial disputes began.

Employment in the retail trade showed a 1.0% increase from September to October. For the most part, reflected increases in the retail component in food stores following the resolution of industrial disputes in British Columbia and in department stores. Employment advanced 0.8% largely reflecting increases in business services and restaurants and taverns.

For more information on Statistical Presentation under Concepts and Methods, see the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers of twenty (20) or more employees in any month of the

## Premières estimations(1) – Novembre 1975

La première estimation désaisonnalisée de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961 = 100) n'indique aucun changement d'octobre à novembre. Des gains dans les mines, les manufactures, la construction et les services ont contrebalancé les baisses enregistrées dans les autres divisions de l'activité économique. L'emploi a augmenté dans la région des Prairies et la Colombie-Britannique et baissé dans les autres régions.

Les gains hebdomadaires moyens non désaisonnalisés au niveau de l'ensemble des activités économiques du Canada n'ont pratiquement pas changé; désaisonnalisés, ils représentent une baisse de 0.3 %. Des fléchissements dans la construction, le commerce et les services ont compensé les progrès enregistrés dans les autres divisions de l'activité économique. Le Québec, les Prairies et la Colombie-Britannique ont accusé une baisse; la région de l'Atlantique et l'Ontario ont connu une hausse.

## Données provisoires(1) – Octobre 1975

## Emploi – Chiffres désaisonnalisés

Les données provisoires pour octobre 1975 révèlent un recul (0.4 %) de l'indice composite de l'emploi dans les activités économiques du Canada. Des baisses de l'emploi dans le transport, les communications et autres services, traduisant surtout les conflits de travail dans les postes, ont surpassé les gains enregistrés dans toutes les autres divisions de l'activité économique. Sans tenir compte de la baisse dans les postes, l'indice composite de l'emploi dans les activités économiques a monté de 0.9 %. Abstraction faite des principaux conflits de travail (dans le forestage, l'amiant, les produits du bois, le papier et produits connexes, le téléphone, les postes, l'électricité et les magasins d'alimentation), qui ont commencé en octobre ou ont été résolus au cours de ce mois, l'indice composite de l'emploi dans les activités économiques a augmenté de 0.2 %.

Entre septembre et octobre, l'emploi dans le secteur manufacturier a progressé de 1.2 %. Le relèvement dans les biens durables traduisait surtout la fin des conflits de travail dans l'industrie des produits du bois en Colombie-Britannique. L'augmentation dans les biens non durables a surtout été observée au niveau des industries des aliments et boissons et de l'industrie du papier et produits connexes; dans cette dernière, les hausses enregistrées en Colombie-Britannique après le règlement des conflits de travail ont plus que compensé les baisses en Ontario, au Québec et dans la région de l'Atlantique où les conflits ne faisaient que débiter.

Le commerce a progressé de 1.0 % entre septembre et octobre. Cette hausse s'est matérialisée, en grande partie, dans le commerce de détail, plus particulièrement dans les magasins d'alimentation à la suite du règlement des conflits de travail en Colombie-Britannique, et les grands magasins. L'augmentation de 0.8 % de l'emploi dans les services est attribuable dans une large mesure aux hausses dans les services extérieurs des entreprises, les hôtels, les restaurants et les tavernes.

(1) Voir Présentation statistique sous concepts et méthodes, à la fin de la présente publication.

(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

Mining recorded a 3.0% rise mainly reflecting the resolution of industrial disputes in asbestos in Quebec. The 0.9% rise in construction employment was in both the building and engineering components. Forestry recorded a 2.5% increase as the substantial rise in British Columbia was offset by the declines in all other regions. The 0.2% rise in finance, insurance and real estate was mainly in financial institutions.

Employment in transportation, communication and other utilities fell 8.8% in October due to the industrial disputes in post office. Somewhat offsetting increases were recorded in telephone and electric power, following the resolution of industrial disputes in Nova Scotia, and in truck transport.

In the *Atlantic Region*, the industrial composite employment index dropped 1.0% in October with declines in all provinces except Nova Scotia. Gains in employment in mineral fuels, highway and bridge maintenance, telephone, electric power and retail trade were more than offset by declines in forestry services, fish products, pulp and paper mills and post office.

The *Quebec* industrial composite index of employment recorded a 1.6% decrease from September to October. Increases in employment occurred in asbestos, iron, textile products, building, food stores and department stores. Employment decreased in logging, wood products, paper and allied industries, highway and bridge maintenance and post office.

In *Ontario*, employment fell by 1.5% in October at the industrial composite level. Advances in employment were recorded in food and beverages, metal fabricating industries, machinery, food stores, department stores, and hotels, restaurants and taverns. These advances were more than offset by the declines in logging, paper and allied industries, motor vehicles, building, post office, electric power, recreational services, and miscellaneous services.

The industrial composite employment index for the *Prairie Region* decreased 0.4% in October; Manitoba and Saskatchewan recorded declines, Alberta remained virtually unchanged. Decreases in post office, food stores and department stores more than offset rises in non-durable goods, both building and engineering, highway and bridge maintenance, and hotels, restaurants and taverns.

In *British Columbia*, the industrial composite employment index leaped 7.7% from September to October as gains in logging, wood products, paper and allied industries, and food stores, following the settlement of industrial disputes, by far outweighed the decline in post office where industrial disputes began. Additional gains were recorded in food and beverages, transportation and hotels, restaurants and taverns.

### Earnings and Hours

*Seasonally-adjusted*, average weekly earnings rose 1.8% at the Canada industrial composite level in October. Gains were recorded in all provinces and in all industry divisions.

*Unadjusted for seasonal variations*, average weekly earnings rose 2.0% to \$213.10 at the national industrial composite level in October. All provinces, except Nova Scotia, participated in the overall rise in the level of earnings.

In *forestry*, average weekly earnings rose 8.9% to \$262.46 mainly reflecting increases in average weekly hours paid in the

Le secteur minier a enregistré une hausse de 3.0 %, s'imputable au règlement des conflits de travail dans l'industrie de l'asbeste au Québec. L'augmentation de 0.9 % de l'emploi dans la construction produite dans le bâtiment et le génie civil. Le forestage a fait un gain de 7.7 % alors que l'importante majoration observée en Colombie-Britannique était absorbée par les baisses dans toutes les autres régions. La progression de 0.2 % dans la finance, l'assurance et l'immeuble a surtout été le résultat des institutions financières.

Le repli de 8.8 % de l'emploi dans le transport, les communications et autres services observé en octobre résulte des conflits de travail dans les postes. Par ailleurs, il a été atténué par un relèvement dans le téléphone, l'électricité, à la suite du règlement des conflits de travail, en Nouvelle-Écosse, et dans le transport routier.

L'indice composite de l'emploi dans les activités économiques a régressé de 1.0 % en octobre dans la *région de l'Atlantique* car des pertes ont été enregistrées dans toutes les provinces sauf la Nouvelle-Écosse. Les gains dans l'emploi notés pour les combustibles minéraux, l'entretien des routes et ponts, le téléphone, l'électricité et le commerce de détail ont été surpassés par les baisses dans les services forestiers, les produits de la pêche, les usines de pâtes et papiers et les postes.

Au *Québec*, l'indice composite a baissé de 1.6 % entre septembre et octobre. Des augmentations de l'emploi ont été notées pour l'amiante, les produits du textile, le bâtiment, les magasins d'alimentation, les grands magasins. L'emploi a diminué dans l'abattage, les produits du papier et produits connexes, l'entretien des routes et ponts, les postes.

En *Ontario*, l'indice composite de l'emploi dans les activités économiques a baissé de 1.5 % en octobre. Des gains dans l'emploi ont été enregistrés dans les aliments et boissons, les produits métalliques, les machines, les magasins d'alimentation, les grands magasins, les restaurants et tavernes. Ces augmentations ont été neutralisées par les baisses observées dans l'abattage, le papier et produits connexes, l'immeuble, le bâtiment, les postes, l'électricité, les services récréatifs et les services divers.

L'indice composite de l'emploi pour la *région des Prairies* a baissé de 0.4 % en octobre; le Manitoba et la Saskatchewan ont enregistré des baisses tandis que l'Alberta n'a accusé pratiquement aucun changement. Les baisses dans les postes, les magasins d'alimentation et les grands magasins ont plus que neutralisé les gains observés dans les biens durables, le bâtiment et le génie civil, l'entretien des routes et ponts, les hôtels, restaurants et tavernes.

En *Colombie-Britannique*, l'indice composite de l'emploi a augmenté de 7.7 % entre septembre et octobre, car les gains enregistrés dans l'abattage, les produits du bois, le papier et produits connexes, les magasins d'alimentation à la suite du règlement des conflits de travail ont beaucoup dépassé la baisse observée dans les postes où les conflits commençaient. Les aliments et boissons, le transport, les hôtels, restaurants et tavernes ont aussi progressé.

### Gains et heures de travail

En octobre, les gains hebdomadaires moyens, *désaisonnalisés*, au niveau de l'ensemble des activités économiques du Canada ont augmenté de 1.8 %. Ils ont été majorés dans toutes les divisions de l'industrie économique et toutes les provinces.

En octobre, les gains hebdomadaires moyens, *non désaisonnalisés*, au niveau de l'ensemble des activités économiques du Canada ont augmenté de 2.0 % à \$213.10, en hausse de 2.0 %. On a observé cette augmentation dans toutes les provinces sauf la Nouvelle-Écosse.

Dans le *forestage*, les gains hebdomadaires moyens se sont élevés de 8.9 %, pour s'inscrire à \$262.46, en raison du plus grand nombre d'heures payées.

c Region and Quebec and substantial gains in employment in Columbia, where earnings exceed the national average.

Average weekly earnings in *mining* rose from \$289.31 in September to \$296.72 in October mainly as a result of increases in non-metals and services incidental to mining. Average weekly hourly-rated wage-earners rose from 39.7 to 40.6 with gains in component groups, while average hourly earnings advanced 9¢ to \$6.87.

In *manufacturing*, average weekly earnings increased 1.9% to \$222.66 in October as gains were recorded in all of the 20 major groups except tobacco processing and products, printing, publishing and electrical products. Average weekly hours worked remained virtually unchanged, while average hourly earnings increased from \$5.14 to \$5.24.

Average weekly earnings in *construction* advanced by 2.1% in October with widespread increases in both building and engineering. Average weekly hours remained unchanged at 40.7, while average hourly earnings jumped 16 cents to \$8.05.

The 3.6% rise in average weekly earnings in *transportation, communication and other utilities* to \$246.18 in October reflected for part the substantial reduction in employment in post office, telegraph and telephone services. Earnings are considerably lower than the average for the division as a whole.

Average weekly earnings in *trade* rose from \$162.02 in September to \$164.78 in October with increases in both wholesale and retail trade. The 0.8% rise in *finance, insurance and real estate* largely reflected gains in financial institutions. In *service*, average weekly earnings increased 2.6% to \$149.98 with component rises ranging from 1.2% in personal services to 3.3% in business services.

d'heures rémunérées par semaine dans la région de l'Atlantique et au Québec et des hausses considérables dans l'emploi en Colombie-Britannique où les gains dépassent la moyenne nationale.

Les gains hebdomadaires moyens dans les *mines* sont passés de \$289.31 en septembre à \$296.72 en octobre en raison surtout des augmentations dans les métaux, les non-métalliques et les services miniers. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure est passé de 39.7 à 40.6, en hausse dans tous les secteurs tandis que les gains horaires moyens ont augmenté de 9 cents pour atteindre \$6.87.

Dans le *secteur manufacturier*, les gains hebdomadaires moyens ont atteint, en octobre, \$222.66, en hausse de 1.9 % puisque des gains ont été observés dans les 20 groupes principaux sauf le traitement et les produits du tabac l'imprimerie, l'édition et produits connexes et les appareils et matériel électriques. Le nombre moyen d'heures hebdomadaires n'a presque pas changé tandis que les gains horaires moyens sont passés de \$5.14 à \$5.24.

Les gains hebdomadaires moyens dans la *construction* ont progressé de 2.1 % en octobre par suite des augmentations générales notées dans le bâtiment et le génie civil. Le nombre moyen d'heures hebdomadaires est demeuré à 40.7 tandis que les gains horaires moyens ont fait un bond de 16 cents pour atteindre \$8.05.

La hausse de 3.6 % des gains hebdomadaires moyens dans le *transport, les communications et autres services d'utilité publique*, passant à \$246.18 en octobre, était en grande partie attribuable à la réduction importante de l'emploi dans les postes, industrie où les gains sont de beaucoup inférieurs à la moyenne pour l'ensemble de la division de l'industrie.

Dans le *commerce*, les gains hebdomadaires moyens sont passés de \$162.02 en septembre à \$164.78 en octobre, des hausses étant observées dans le commerce de gros et celui de détail à la fois. L'augmentation de 0.8 % dans les *finances, les assurances et l'immeuble* résultait surtout des gains dans les institutions financières. Dans les *services*, les gains hebdomadaires moyens ont progressé de 2.6 % pour atteindre \$149.98, alors que le taux d'accroissement par secteur a varié entre 1.2 % pour les services personnels et 3.3 % pour les services extérieurs des entreprises.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 10. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month Année et mois	Weekly earnings in current dollars Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars (1961=100) Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars Indices de la rémunération hebdomadaire en dollars de 1961

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

**HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)**  
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

**1957-1960**

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

**1961-1970**

*Employment Indexes*, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

*Employment Indexes*, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

*Average Weekly Earnings*, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Ontario: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

*Average Weekly Earnings*, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

*Average Weekly Hours, Average Hourly Earnings, Average Wages* of Hourly-rated Wage-earners - 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

**DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)**  
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).

4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

**A. 1957-1960**

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

**B. 1961-1970**

*Indices de l'emploi*, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. *Indices de l'emploi*, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

*Gains hebdomadaires moyens*, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

*Gains hebdomadaires moyens*, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

*Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens* des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

*Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

*Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.*

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

### C. 1971-1973

*Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.*

*Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.*

*Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.*

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 catalogue, juin 1972.

*Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

*Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.*

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n°s 72-201 et 72-202 au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n°s 72-201 et 72-202 au catalogue, 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

### C. 1971-1973

*Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada - Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.*

*Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne, janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.*

*Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires - moyennes et rémunération horaire moyenne des ouvriers (heures - déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

### Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

### Pay Period

Conceptually, the figures refer to the last seven days in the calendar month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The numerators of the fractions are the number of working days in the reported pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the month. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du total estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

## Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

## Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, le cas échéant, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont regroupées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines incluent généralement le territoire avoisinant avec le centre urbain. On peut obtenir une liste montrant le territoire inclus dans chaque région urbaine tabulée à partir du Monthly Employment,

rolls and Labour Income Section. The reporting units not located in tabulated urban area are included in county, provincial and national totals.

## Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" appears in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

**Industrial composite (031-899)** - The sum of the industries included in the survey. (see Coverage)

**Durable goods manufacturing (durable)** - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

**Non-durable goods manufacturing (non-dur)** - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

**Building (404,421)** - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

**Engineering (406-409)** - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

## Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons on non-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

**Ensemble des industries (031-899)** - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

**Manufactures, biens durables (durable)** - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

**Manufactures, biens non durables (non dur.)** - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274), de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

**Bâtiment (404, 421)** - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

**Genie civil (C.T.I. 406-409)** - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paie des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme salariés les ouvriers et tous les employés qui sont rémunérés pour leurs services qui sont en congé payé pendant la période de référence, à l'exception occasionnels ayant travaillé moins de sept heures pendant la période payée. Les *salariés réguliers à temps partiel* sont comptés parmi les salariés quel que soit le nombre d'heures qu'ils travaillent pendant la période payée.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les salariés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

### Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mode de rémunération. Les ouvriers sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour l'ensemble. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux ouvriers dont on peut connaître le nombre d'heures de travail.

### Employés

Les employés comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, les employés de bureau, les commis et les travailleurs assimilés au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des ouvriers et des employés représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend le salaire de base, la rémunération au taux ordinaire, la rémunération du travail aux pièces, les commissions régulières, les primes au rendement, les primes de vie et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des ouvriers et des employés. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" des salariés pris en compte ici. Ce système

present publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was able.

## Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the cycle, and irregular components of the time series. The X-11 method of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted indexes may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-202).

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom details are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

## Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimates because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the monthly tables when all returns are retabulated to produce revised monthly and annual averages; these data are contained in catalogue 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relatives aux heures pour lesquels les heures sont enregistrées ne sont pas disponibles.

## First Estimates(1) – December 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) employment index showed a 1.9% rise from November. For the most part, this advance reflected the increase in transportation, communication and other utilities following the resolution of industrial disputes in the post office. Increases in employment were also recorded in all other industry divisions except forestry.

Unadjusted for seasonal variations, average weekly earnings in the national industrial composite decreased 1.5% in December. This represents a rise of 1.0% on a seasonally-adjusted basis. The decreases in forestry, mining, manufacturing and construction generated the decreases in hours paid associated with the holiday. The drop in transportation, communication and other utilities reflected the increased employment in the post office, where wages are lower than the industry division average.

## Preliminary Data(1) – November 1975

## Employment (Seasonally-adjusted)

Preliminary data for November 1975 showed a slight rise in the Canada industrial composite employment index from October. Manufacturing employment rose 0.2%; widespread increases in the goods component were somewhat offset by declines in paper and printing industries due to industrial disputes. Mining employment fell 0.2% largely as the result of the resolution of industrial disputes. Increases were also recorded in building, engineering, food processing, automotive product stores, financial institutions, and hotels, restaurants and taverns. Employment declined throughout the transportation component, in particular in railway transport, truck transport, highway and bridge maintenance. Decreases also occurred in the retail trade, department stores, and recreational and business services. The 7.9% fall in forestry employment mainly reflected the impact associated with the ongoing industrial disputes in paper and printing industries.

## Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.9% at the national industrial composite level; gains occurred in all regions except the Atlantic Region, and in all industry divisions except forestry and printing.

For more information, see the note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and health services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers employing twenty (20) or more employees in any month of the year.

## Premières estimations (1) – Décembre 1975

Après désaisonnalisation, la première estimation de l'indice composite de l'emploi dans les activités économiques (2) du Canada a enregistré une hausse de 1.9% entre novembre et décembre. Cette hausse reflète en grande partie l'augmentation dans les transports, les communications et autres services d'utilité publique résultant du règlement des conflits du travail dans les postes. L'emploi a également augmenté dans toutes les autres divisions de l'activité économique, à l'exception du forestage.

Sans désaisonnalisation les gains hebdomadaires moyens pour l'ensemble des activités économiques à l'échelle nationale ont diminué de 1.5% en décembre, ce qui représente une progression de 1.0% sur une base désaisonnalisée. Les diminutions dans le forestage, les mines, les manufactures et la construction reflètent en général la diminution des heures rémunérées en raison de la saison des vacances. La diminution dans les transports, les communications et les autres services d'utilité publique reflète principalement la progression de l'emploi dans les bureaux de poste où les gains sont inférieurs à la moyenne des divisions de l'activité économique.

## Données provisoires (1) – Novembre 1975

## Emploi (chiffres désaisonnalisés)

Les données provisoires pour novembre 1975 indiquent, par rapport à octobre, une légère augmentation dans l'indice composite de l'emploi dans les activités économiques du Canada. Dans les industries manufacturières, l'emploi a progressé de 0.2%; des augmentations généralisées dans les biens durables ont été quelque peu compensées par des diminutions dans l'industrie du papier et des produits connexes en raison de conflits du travail. La progression de 2.4% dans les mines est surtout attribuable au règlement des conflits du travail dans les métaux. On a également observé des augmentations dans la construction, le génie civil, les magasins d'alimentation, les pièces et accessoires pour l'automobile, les institutions financières, et les hôtels, restaurants et tavernes. Par contre, l'emploi a diminué dans la composante du transport, en particulier le transport ferroviaire, le transport par camion et l'entretien des routes et des ponts. Il a également diminué dans le commerce de gros, les magasins à rayon, les services récréatifs et les services extérieurs des entreprises. La diminution de 7.9% dans le forestage est surtout attribuable aux diminutions liées aux conflits permanents du travail dans les industries du papier et des produits connexes.

## Gains et heures de travail

Après désaisonnalisation, les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont accusé une hausse de 0.9%; des augmentations ont été observées dans toutes les régions à l'exception de la région de l'Atlantique et dans toutes les divisions de l'activité économique à l'exception du forestage et de la construction.

- (1) Voir la note sur la présentation statistique sous la rubrique 'Concepts et méthodes' à la fin de la présente publication.
- (2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations des employeurs ayant vingt (20) salariés ou plus à leur service au cours d'un mois quelconque de l'année.

Unadjusted for seasonal variations, average weekly earnings rose 0.2% to \$213.34 as gains in British Columbia, Alberta, Ontario, Nova Scotia and Prince Edward Island more than offset decreases in the remaining provinces. There were widespread increases in average weekly earnings in durable-goods, non-durable goods, transportation, wholesale trade, financial institutions, all components of service, and most sectors of mining. Offsetting decreases were recorded in logging, engineering, retail trade, and insurance and real estate.

Average weekly hours of hourly-rated wage-earners increased 0.2 hours in mining to 40.7, decreased 0.2 hours in manufacturing to 38.9 and dropped 1.3 hours in construction to 39.6. Average hourly earnings advanced six cents in mining to \$6.94, five cents in manufacturing to \$5.29 and nine cents in construction to \$8.13.

Sans désaisonnalisation, les gains hebdomadaires moyens atteignent \$213.34, soit une augmentation de 0.2%, alors que les augmentations en Colombie-Britannique, en Alberta, en Ontario, en Nouvelle-Écosse et dans l'Île-du-Prince-Édouard ont plus que compensé les diminutions dans les autres provinces. Des augmentations généralisées des gains hebdomadaires moyens ont été observées dans les biens durables et non durables, les transports, le commerce de gros, les institutions financières, toutes les composantes des services et la plupart des secteurs des mines. Des diminutions compensatoires ont été enregistrées dans l'abattage, le génie civil, le commerce de détail, les assurances et l'immeuble.

Les heures hebdomadaires moyennes des salariés rémunérés à l'heure ont augmenté de 0.2 heure pour passer à 40.7, alors qu'elles ont diminué de 0.2 heure (38.9) dans les manufactures et de 1.3 heure (39.6) dans la construction. Les gains horaires moyens ont augmenté de six cents dans les mines (\$6.94), de cinq cents dans les manufactures (\$5.29) et de neuf cents dans la construction (\$8.13).

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

# **HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)** (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

## **1957-1960**

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

## **1961-1970**

*Employment Indexes*, 1961-1964, for Canada and Ontario, for ways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, *Catalogue 72-002, October 1971*.

*Employment Indexes*, 1965-1967, for Canada and Ontario, for ways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

*Average Weekly Earnings*, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Alberta and Saskatchewan: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

*Average Weekly Earnings*, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale and retail trade; trade; industrial composite. *Catalogue 72-002, February 1972*.

*Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners* - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

# **DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)** (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

## **A. 1957-1960**

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

## **B. 1961-1970**

*Indices de l'emploi*, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, *n° 72-002 au catalogue, octobre 1971*.

## CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Force Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and presented in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

### Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had a few employees.

### Reference Period

Conceptually, the figures refer to the last seven days in the reference months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The numerators of the fractions are the number of working days in the reference pay periods. For employees paid at annual or monthly rates, their earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

### Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

## CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

### Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

### Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

### Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

## Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

## Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobées ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir

rolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and national totals.

## Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" runs in the main tables refer to this manual. The tables contain groupings not found in the Standard Industrial Classification. These include:

*Industrial composite* (031-899) - The sum of the industries included in the survey. (see Coverage)

*Durable goods manufacturing* (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

*Non-durable goods manufacturing* (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

*Building* (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

*Engineering* (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

## Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-union directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

## Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

*Ensemble des industries* (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

*Manufactures, biens durables* (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

*Manufactures, biens non durables* (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

*Bâtiment* (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

*Genie civil* (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

## Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

### Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

### Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

### Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme salariés tous les ouvriers et tous les employés qui sont rémunérés pour leurs services, qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période payée. Les *salariés réguliers à temps partiel* sont comptés parmi les salariés quel que soit le nombre d'heures qu'ils travaillent pendant la période payée.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les salariés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

### Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mode de rémunération. Les ouvriers sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux ouvriers dont on peut connaître le nombre d'heures de travail.

### Employés

Les employés comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, le bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

### Rémunération

Les rémunérations des ouvriers et des employés représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère, les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des ouvriers et des employés. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" des salariés pris en compte ici. Ce système permet

present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

## Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-206).

## Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both these averages apply only to the subset of wage-earners for whom weekly details are reported. It should be noted that total hours include both full-time hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

## Statistical Presentation

Each month, statistics for three months are prepared by the monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Two of these latter estimates are of higher quality than that of the first use of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the final tabulations when all returns are retabulated to produce revised annual and annual averages; these data are contained in catalogue 72-201 and 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

## Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

## Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

## Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

72-005 Estimations du revenu du travail. Bil.

#### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées. Bil.

#### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-508 Estimations du nombre d'employés par province et industrie. Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie. Bil.

72-514 Estimations du nombre d'employés par province et par industrie. Bil.

#### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970. Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972. Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973. Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970. Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970. Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971. Bil.

72-613 Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972. Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

- 72-002 Employment, Earnings and Hours. Bil.
- 72-005 Estimates of Labour Income. Bil.

#### Annual

- 72-206 Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

#### Occasional

- 72-506 Labour Costs in Manufacturing. Bil.
- 72-508 Estimates of Employees by Province and Industry. Bil.
- 72-510 Labour Costs in Manufacturing. Bil.
- 72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.
- 72-513 Estimates of Employees by Province and Industry. Bil.
- 72-514 Estimates of Employees by Province and Industry. Bil.

#### Annual/Variou

- 72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.
- 72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.
- 72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.
- 72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.
- 72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.
- 72-612 Labour Costs in Canada: Manufacturing, 1971. Bil.
- 72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*
